Math Literacy | Table of Contents

Chapter 1: Foundations

1.1 Introduction to Whole Numbers
- Place Values and Rounding
  - Identify the place value of a digit and write a whole number using words or digits
  - Round whole numbers
- Prime Factorization and Least Common Multiples
  - Identify multiples and apply divisibility tests
  - Find the prime factorization of a number
  - Find the least common multiple of two numbers

1.2 Language of Algebra
- Use the Language of Algebra
  - Translate algebraic expressions, equations, and inequalities into English and recognize expressions and equations
  - Evaluate a whole number raised to a power and understand the terminology
- Order of Operations and Simplifying Expressions
  - Simplify an expression using order of operations
  - Evaluate an expression
  - Identify coefficients and identify and combine like terms
- Rewrite English Phrases into Algebraic Expressions
  - Translate an English phrase to an algebraic expression
  - Translate English phrases from applications into algebraic expressions

1.3 Operations with Integers
- Intro to Integers and Absolute Value
  - Order integers using inequality symbols and determine the opposite of integers or variables
  - Evaluate an absolute value expression
  - Simplify an expression involving absolute value using order of operations
- Adding and Subtracting Integers
  - Add integers
  - Subtract integers
  - Add and subtract integers using order of operations
- Multiply and Divide Integers
  - Multiply integers
  - Divide integers

1.4 Simplifying Expressions
- Simplifying Expressions with Integers
  - Simplify expressions with integers using order of operations
  - Evaluate a variable expression with integers
• Algebraic Expressions and Applications with Integers
  • Translate an English phrase to an algebraic expression with integers
  • Use integers in applications

1.5 Fractions
• Visualize Fractions
  • Identify when fractions are equivalent
  • Simplify a fraction
• Multiplying and Dividing Fractions
  • Multiply fractions
  • Divide fractions
  • Simplify complex fractions
• Understanding Expressions with Fractions
  • Simplify expressions written with a fraction bar
  • Translate an English phrase to an expression with fractions
• Add and Subtract Fractions
  • Add or subtract fractions with a common denominator
  • Add or subtract fractions with different denominators
• Algebraic Expressions with Fractions
  • Use the order of operations to simplify complex fractions and expressions with multiple operations
  • Evaluate variable expressions with fractions

1.6 Decimals
• Understanding and Rounding Decimals
  • Name and write decimals
  • Round decimals
• Operations with Decimals
  • Perform operations with decimals
  • Add and subtract decimals
  • Multiply decimals
  • Divide decimals
• Decimals, Fractions, and Percents
  • Convert between fractions and decimals
  • Simplify expressions with fractions and decimals
  • Convert between decimals and percents
• Estimation
  • Estimate a value by rounding a whole number
  • Estimate a value by rounding a decimal
1.7 Square Roots and the Real Number System
- Square roots and real numbers
  - Evaluate a square root
  - Identify rational numbers and irrational numbers
  - Identify real numbers
- Fractions and Decimals on the Number Line
  - Locate fractions on a number line and write inequality statements involving fractions
  - Locate decimals on a number line and write inequality statements involving decimals

1.8 Properties of the Real Number System
- Properties of the Real Number System
  - Use the commutative and associative properties
  - Identify additive and multiplicative inverses of a number
  - Understand the multiplication and division properties of zero
  - Simplify expressions using properties of identities, inverses, and zero
- The Distributive Property
  - Simplify expressions using the distributive property
  - Simplify expressions by distributing a negative number

Chapter 2: Logic and Critical Thinking

2.1 Inductive and Deductive Reasoning
- Principles of inductive and deductive reasoning
  - Understand and use inductive reasoning
  - Understand and use deductive reasoning
- Set Fundamentals
  - Represent a set using a written description and the roster method
  - Represent a set using set builder notation
  - Identify the cardinal number for a set
  - Determine if two sets are equivalent
  - Determine if two sets are equal
- Sets Applications
  - Identify subsets, universal sets, and empty sets
  - Distinguish between finite and infinite sets
  - Identify subsets and proper subsets using set notation
  - Determine the number of subsets and proper subsets in a given set

2.2 Venn Diagrams, Sets, and Set Operations
- Venn Diagrams from Sets
  - Illustrate the universal set, a set, and complement of a set using a Venn diagram
  - Illustrate two sets using Venn diagram and set notation
• Venn Diagram and Set Operations
  • Determine the complement of a set using Venn diagrams and proper set notation
  • Determine the intersection of two sets using Venn diagrams and set notation
  • Determine the union of two sets using Venn diagrams and set notation

• Set Operations
  • Perform operations on sets
  • Find the difference and cartesian product of two sets

2.3 Statements and Logic
• Statement and Logical Connectives
  • Use Venn diagrams to find the result of set operations on two sets
  • Determine the cardinal number of a union of two finite sets
  • Identify and negate simple statements
  • Identify and negate quantified statements
  • Identify logical connectives and compound statements

• Converting Logic Statements to English
  • Represent and/or/not statements in symbolic form and English
  • Represent conditional statements in symbolic form and English
  • Write biconditional statements in symbolic form and English

• Truth Tables for Negation, Conjunction, and Disjunction
  • Construct a truth table for a statement with a conjunction and/or a negation and determine its truth value
  • Construct a truth table for a statement with a disjunction and/or a negation and determine its truth value

• Truth Tables for Compound, Conditional and Biconditional Statements
  • Construct a truth table for a compound statement with a conjunction and disjunction and determine its truth value
  • Construct a truth table for a conditional statement and determine its truth value
  • Construct a truth table for a biconditional statement and determine its truth value
  • Identify self-contradictions, tautologies, and implications

• Equivalent Statements
  • Determine if two symbolic statements are equivalent using a truth table
  • Determine if two statements given in English are equivalent using a truth table
  • Determine if two statements are equivalent using De Morgan's laws

• Euler Diagrams and Syllogistic Arguments
  • Identify syllogistic arguments
  • Represent a syllogistic argument with a Euler diagram
  • Determine if a syllogistic argument is valid with a Euler diagram
Chapter 3: Introduction to Algebra

3.1 Solving Equations with Subtraction and Addition

- Solve Equations with the Subtraction and Addition Properties of Equality
  - Verify a solution of an equation
  - Solve an equation using the subtraction and addition properties of equality
  - Solve an equation involving fractions or decimals using the subtraction and addition properties of equality
  - Solve an equation that requires simplification using the subtraction and addition properties of equality

- Application Problems and the Subtraction and Addition Properties of Equality
  - Translate an English sentence to an algebraic equation and solve using the subtraction and addition properties of equality
  - Use the subtraction and addition properties of equality to solve application problems

3.2 Solving Equations with Division and Multiplication

- Solve Equations Using the Division and Multiplication Properties of Equality
  - Solve an equation using the division and multiplication properties of equality
  - Solve an equation involving fractions or decimals using the division and multiplication properties of equality
  - Solve an equation that requires simplification using the division and multiplication properties of equality

- Application Problems and the Division and Multiplication Properties of Equality
  - Translate an English sentence to an algebraic equation and solve using the division and multiplication properties of equality
  - Use the division and multiplication properties of equality to solve application problems

- Solve Equations with Variables and Constants on Both Sides
  - Solve an equation with constants on both sides
  - Solve an equation with variables on both sides
  - Solve an equation with constants and variables on both sides

3.3 Solving Linear Equations, General Strategies, Fractions and Decimals

- General Strategies for Solving Linear Equations
  - Solve an equation using the distributive property with variables on one side
  - Solve an equation using the distributive property with variables on both sides
  - Classify equations as conditional, identity, or a contradiction

- Solve Equations with Fractions
  - Solve an equation involving fractions with variables on both sides
  - Solve an equation involving fractions by eliminating the fractions
  - Solve an equation involving fractions by eliminating the fractions and other steps

- Solve Linear Equations with Decimals
  - Solve an equation involving decimals with variables on both sides
  - Solve an equation involving decimals by clearing the decimals
• Distance, Rate, and Time and Literal Equations
  • Use the distance, rate, and time formula
  • Solve a formula for a specific variable

3.4 Solving Linear Inequalities
• Inequalities, the Number line and Interval Notation
  • Graph an inequality on the number line
  • Express an inequality using interval notation
• Solving One-Step Linear Inequalities
  • Solve an inequality using the subtraction and addition properties of inequality
  • Solve an inequality using the division and multiplication properties of inequality
• Solving Linear Inequalities
  • Solve an inequality that requires simplification
  • Classify an inequality as conditional, identity, or contradiction
  • Translate an English sentence into an inequality and solve

3.5 Math Models & Applications
• An Introduction to Problem Solving
  • Use a problem-solving strategy for word problems
  • Solve a number problem
  • Solve a number problem involving consecutive integers
• Solve Mixture Applications
  • Solve coin word problems
  • Solve ticket and stamp word problems
  • Use the mixture model to solve word problems  [DELETE]
• Solve Uniform Motion Applications
  • Solve uniform motion applications
• Solve Applications with Linear Inequalities
  • Solve one-step applications with linear inequalities
  • Solve applications with linear inequalities

Chapter 4: Applied Linear Graphing
4.1 Graphs and the Coordinate System
• Reading Graphs and the Rectangular Coordinate System
  • Plot points on a rectangular coordinate system
  • Verify the solution to an equation in two variables
  • Complete a table of solutions to a linear equation in two variables
  • Find solutions to a linear equation
• Graph Linear Equations in Two Variables
  • Recognize the relationship between the solutions of an equation and its graph
  • Graph a linear equation by plotting points
• Graph a linear equation in standard form by plotting points
• Graph vertical and horizontal lines (*1)

• Intercepts on the Coordinate Plane
  • Identify the x- and y-intercepts on a graph
  • Find the x- and y-intercepts from an equation of a line
  • Graph a line using the x- and y-intercepts (*1)

4.2 Working with Slope
• Understanding Slope
  • Use a geoboard to model slope
  • Use the relationship between rise and run to find the slope of a line from its graph

• Find the slope of horizontal and vertical lines
  • Use the slope formula to find the slope of a line between two points
  • Graph a line given a point and the slope (*1)
  • Determine the slope in applications

• Slope-Intercept Form
  • Identify the slope and y-intercept from an equation of a line and relate a graph to the equation
  • Graph a line given its equation using its slope and y-intercept
  • Graph lines using a variety of methods
  • Graph and interpret applications of slope-intercept (*6)

• Parallel and Perpendicular Lines
  • Use slopes to identify parallel lines
  • Use slopes to identify perpendicular lines

4.3 Equation of a Line
• Find the Equation of a Line
  • Find an equation of the line given the slope and y-intercept
  • Find an equation of the line given the slope and a point
  • Find an equation of the line given two points

• Equations of Parallel and Perpendicular Lines
  • Find an equation of a line parallel to a given line
  • Find an equation of a line perpendicular to a given line

4.4 Graphs of Linear Inequalities
• Graphing Linear Inequalities
  • Verify solutions to an inequality in two variables
  • Recognize the relationship between the solutions of an inequality and its graph
  • Graph a linear inequality

4.5 Functions and Function Notation
• Introduction to Functions
  • Identify domain and range from a set of ordered pairs
  • Determine whether a relation represents a function
• Use the vertical line test to identify functions
• Find the domain and range of a function defined by a graph

Function Notation
• Understand function notation
• Evaluate a function using function notation

Chapter 5: Systems of Linear Equations
5.1 Solving Systems of Equations
• Solve Systems of Equations by Graphing
  • Determine whether an ordered pair is a solution of a system of linear equations
  • Solve a system of linear equations by graphing
  • Determine the number of solutions of a linear system
  • Solve applications of systems of linear equations by graphing
• Solve Systems of Equations by Substitution
  • Solve a system of linear equations by substitution
  • Solve applications of systems of linear equations by substitution
• Solving Systems of Linear Equations by Elimination
  • Solve a system of linear equations by elimination
  • Solve applications of systems of equations by elimination
  • Solve a system of linear equations using a variety of methods
5.2 Applications with Systems of Equations
• Systems of Linear Equations and Problem Solving
  • Translate a word problem to a system of equations
  • Solve a word problem using a system of equations
  • Solve an application in geometry using a system of equations
  • Solve uniform motion applications using a system of equations
• Mixture Problems and Systems of Equations
  • Solve mixture applications involving tickets or money with a system of equations
  • Solve mixture applications involving concentrations using a system of equations
  • Solve interest applications using a system of equations
• Solving Systems of Linear Inequalities
  • Determine whether an ordered pair is a solution of a system of linear inequalities
  • Solve a system of linear inequalities by graphing
  • Solve applications of systems of linear inequalities

Chapter 6: Polynomials
6.1 Operations with Polynomials
• Adding and Subtracting Polynomials
  • Identify the types and degrees of polynomials
  • Add and subtract monomials
Add and subtract polynomials
Evaluate a polynomial for a given value

Product Properties of Exponents
- Simplify numerical expressions containing exponents
- Simplify expressions using the product property for exponents
- Simplify expressions using the power property for exponents or the product to a power property for exponents
- Simplify expressions by applying several properties

Multiplying Polynomials
- Multiply monomials
- Multiply a polynomial by a monomial
- Multiply a binomial by a binomial
- Multiply a trinomial by a binomial

Special Products of Binomials
- Square a binomial using the binomial squares pattern
- Multiply conjugates using the product of conjugates pattern
- Recognize and use the appropriate special product pattern

6.2 Dividing Monomials and Polynomials
- Quotient Properties of Exponents and Dividing Monomials
  - Simplify expressions using the quotient property for exponents and the exponent of zero
  - Simplify expressions using the quotient to a power property
  - Simplify expressions by applying several quotient properties of exponents
  - Divide monomials
- Dividing Polynomials
  - Divide a polynomial by a monomial
  - Divide a polynomial by a binomial using polynomial long division

6.3 Exponents and Scientific Notation
- Negative Exponents
  - Use the definition of a negative exponent
  - Simplify expressions with integer exponents
- Scientific Notation
  - Convert from decimal notation to scientific notation
  - Convert from scientific notation to decimal notation
  - Multiply and divide using scientific notation

6.4 Simplifying Square Roots
- Evaluating, Estimating, and Approximating Square Roots
  - Evaluate square root expressions
  - Estimate square roots
  - Approximate square roots
● Simplifying Square Roots with Variables and Square Roots in Applications
  ● Simplify variable expressions with square roots
  ● Use square roots in applications

Chapter 7: Factoring
7.1 Factoring Quadratic Trinomials
  ● The Greatest Common Factor and Factoring by Grouping
    ● Find the greatest common factor of two or more expressions
    ● Factor the greatest common factor from a polynomial
    ● Factor a polynomial by grouping
  ● Factoring Trinomials with a Leading Coefficient of 1
    ● Factor a trinomial of the form $x^2+bx+c$ where $c$ is positive
  ● Factoring Trinomials with a Leading Coefficient of 2
    ● Factor a trinomial of the form $x^2+bx+c$ where $c$ is negative
  ● Factoring Trinomials with a Leading Coefficient of 3
    ● Factor a trinomial of the form $x^2+bx+c$ where $c$ is positive
  ● Factoring Trinomials with a Leading Coefficient Other than 1
    ● Factor a trinomial of the form $ax^2+bx+c$ with a GCF
  ● Factoring Trinomials with a Leading Coefficient Other than 2
    ● Factor a trinomial using trial and error
  ● Factoring Trinomials with a Leading Coefficient Other than 3
    ● Factor a trinomial using the 'ac' method
  ● Factoring Special Products
    ● Factor a perfect square trinomial
    ● Factor a difference of squares
    ● Factor sums and differences of cubes

7.2 General Strategy for Factoring Polynomials
  ● Choosing a Factoring Strategy
    ● Recognize and use the appropriate method to factor a polynomial completely
  ● Solving Quadratic Equations by Factoring
    ● Solve a factored quadratic equation using the zero product property
    ● Solve a quadratic equation by factoring
    ● Solve applications modeled by quadratic equations

Chapter 8: Percents Ratios and Proportions
8.1 Rate and Ratios
  ● Writing Ratios and Using Ratios in Applications
    ● Write a ratio as a fraction
    ● Use ratios in applications
Unit Rates and Unit Prices

- Write a rate as a fraction
- Find unit rates
- Find unit price
- Translate phrases to expressions as rates or ratios

8.2 Proportions and Applications

- Definition of Percent and Converting Percents
  - Use the definition of percent
  - Convert percents to fractions
  - Convert percents to decimals
  - Convert decimals and fractions to percents
- Solve applications using proportions
  - Translate and solve basic percent equations
  - Solve applications of percent
  - Find percent increase and percent decrease
- Working with Proportion
  - Use the definition of proportion
  - Solve a problem involving proportions
- Writing and Solving Percent Proportions
  - Write percent equations as proportions
  - Translate and solve percent proportions

8.3 Percent Applications and Financial Mathematics

- Simple Interest and Discounts
  - Solve sales tax applications
  - Solve commission applications
  - Solve discount applications
  - Solve mark-up applications
- Working with Percent
  - Translate and solve basic percent equations
  - Solve basic applications of percent
  - Find percent increase or percent decrease
- Simple Interest Applications
  - Use the simple interest formula
  - Solve simple interest applications
- Percent, Sales Tax, and Income Tax
  - Convert between percents, decimals, and fractions
  - Determine the final cost of an item including sales tax and discounts
  - Calculate income tax
8.4 Compound Interest
- Evaluate exponential functions
  - Evaluate exponential functions
  - Evaluate exponential functions with base e
- Calculate periodically compounded interest
  - Calculate compound interest
  - Calculate continuously compounded interest
- Applications of Compound Interest
  - Calculate effective annual yield
  - Calculate the value of an annuity

8.5 Advanced Applications - Financial Mathematics
- Annuities, Stocks, and Bonds
  - Calculate the payment needed to achieve a determined future value
  - Define stock terminology
  - Read a stock table
- Installment Loans and Amortization
  - Calculate the monthly payment and interest cost for a mortgage
  - Construct a loan amortization schedule
  - Choose the best installment loan plan
- Credit Cards and interest
  - Recognize key features of credit cards
  - Calculate the average daily balance of a credit card
  - Determine interest to be paid on a card's next billing date

Chapter 9: Descriptive Statistics and Probability Basics
9.1 Graphic Displays of Data
- Frequency Tables
  - Constructing and understanding frequency tables for a set of data
  - Construct and understand relative frequency tables for a set of data
  - Construct and understand cumulative relative frequency tables for a set of data
- Histograms
  - Create and interpret histograms (*22)
  - Identify and label shapes of histograms
● Histograms and Frequency Tables with Technology - Calculator
   ● Construct and understand frequency tables for a set of data with technology - Calculator
   ● Construct and understand relative frequency tables for a set of data with technology - Calculator
   ● Create and interpret histograms with technology - Calculator

● Histograms and Frequency Tables with Technology - Excel
   ● Construct and understand frequency tables for a set of data with technology - Excel
   ● Construct and understand relative frequency tables for a set of data with technology - Excel

● Dot Plots and Stem and Leaf plots
   ● Create and interpret stem-and-leaf plots
   ● Create and interpret dot plots (*17)

● Line and Bar Graphs
   ● Create and interpret bar graphs (*21)
   ● Create and interpret line graphs of data (*17)

● Create and interpret dot plots and line graphs with technology - Calculator
   ● Create and interpret dot plots with technology - Calculator
   ● Create and interpret line and bar graphs of data with technology - Calculator

● Create and interpret dot plots and line graphs with technology - Excel
   ● Create and interpret dot plots with technology - Excel
   ● Create and interpret line and bar graphs of data with technology - Excel

● Interpreting Graphs
   ● Identify situations in which statistics can be misleading
   ● Analyze graphical misrepresentations of data
   ● Choose appropriate graphs and charts to display data

9.2 Measures of Center, Dispersion and Position

● Measures of Central Tendency - Foundations
   ● Find the mean of a set of data (*15)
   ● Find the mean from a frequency table (*1)
   ● Find the median of a set of data
   ● Find the mode of a set of data

● Impact of Outliers on Measures of Central Tendency
   ● Identify the effect of outliers on measures of central tendency
   ● Determine whether the mean, median, or mode is the best measure of center for a data set

● Distribution Shape
   ● Define and interpret number of modes in a data set
   ● Determine if a data set is skewed
• Standard Deviation
  • Compute variance and standard deviation
  • Interpret the standard deviation of a set of data
  • Calculate the mean of a set of numbers
  • Find the median of a set of numbers
  • Find the mode of a set of numbers

9.3 Intro to Probability
• Averages and Probability
  • Calculate the mean of a set of numbers
  • Find the median of a set of numbers
  • Find the mode of a set of numbers
• Predictions and Probability
  • Understand probability
  • Make and test predictions using probability models
• Calculating the Probability of an Event
  • Apply the basic definition of probability

Chapter 10: Measurement Systems, Dimensional Analysis, and Geometry
10.1 Unit Conversions
• US System Conversions
  • Make unit conversions in the US system
  • Use mixed units of measurement in the US system
  • Make unit conversions in the metric system
• Metric System Conversions
  • Use mixed units of measurement in the metric system
  • Make unit conversions in the metric system
• Unit Conversion Between Systems
  • Convert between the US and metric systems of measurement
  • Convert between Fahrenheit and Celsius temperatures
• Working with Angles
  • Identify right, acute, obtuse, and straight angles
  • Understand supplementary and complementary angles
  • Understand alternate interior angles, alternate exterior angles, and corresponding angles

10.2 Geometry Basics
• Points, Lines, and Planes
  • Construct a line, line segment, and ray given two points
  • Find the intersection or union of two line segments, a ray and a line segment, or two rays
  • Identify planes
Polygons
- Identify polygons given their properties
- Use properties of similar polygons to solve for a missing side
- Determine the measure of an angle using properties of polygons

Triangles
- Identify triangles given their properties
- Use properties of triangles and right angles
- Use properties of similar triangles to solve for a missing side
- Use the Pythagorean theorem

Circles
- Find the circumference and area of circles
- Find the area of complex shapes including circles

10.3 Irregular Figures
- Find the Area of Trapezoids
- Use properties of trapezoids

Area and Circumference of Circles and Area of Irregular Figures
- Solve problems involving the area and circumference of circles
- Find the area of irregular figures made from rectangles and triangles
- Find the area of irregular figures made from circles and other shapes

10.4 Solve Geometry Applications - Triangles, Rectangles, and the Pythagorean Theorem
- Triangles and the Pythagorean Theorem
  - Solve problems involving the perimeter, area, and interior angles of triangles
  - Solve triangle problems where angles or sides are given in terms of other angles or sides
  - Solve triangle problems using the Pythagorean Theorem
- Area and Perimeter of Rectangles
  - Solve problems involving the perimeter and area of rectangles
  - Solve rectangle problems when the width is given in terms of the length

10.5 Volume applications
- Volume and Surface Area of Rectangular Solids and Spheres
  - Find volume and surface area of rectangular solids and cubes
  - Find volume and surface area of spheres
- Volume and Surface Area of Cylinders and Cones
  - Find volume and surface area of cylinders
  - Find volume of cones

10.6 Distance, rate and time formula
- The Distance, Rate, and Time Formula and Solving for a Specific Variable
  - Use the distance, rate, and time formula
  - Solve a given formula for a specific variable
  - Solve a formula for y
Chapter 11: Trigonometry

11.1 Right Triangle Trigonometry
- The Six Trigonometric Ratios
  - Use right triangles to evaluate sine, cosine, and tangent functions
  - Evaluate reciprocal trigonometric functions using right triangles for a sine, cosine, or tangent function
  - Evaluate trigonometric functions of angles not in standard position
- Use Right Triangle Trigonometry in Solving Problems
  - Find missing side lengths using trig ratios
  - Use right triangle trigonometry to solve applied problems

11.2 Angles as Rotations and Arc Length
- Angles as Rotations and Radian Measures
  - Identify the measure of positive and negative angles in standard position and the quadrant of the terminal side
  - Convert between degree and radian measure of an angle
  - Understand when two angles are coterminal
- Arc Length and Area of a Sector
  - Find the length of an arc
  - Find the area of a sector of a circle
  - Understand the relationship between linear and angular speed

11.3 The Unit Circle
- Sine and Cosine Values in the First Quadrant
  - Understand sine and cosine values on the unit circle
  - Find exact sine and cosine values for angles in the first quadrant of the unit circle
- Sine and Cosine Values with Reference Angles
  - Find the reference angle for a given angle
  - Use reference angles to evaluate sine and cosine functions
  - Use reference angles to find coordinates on the unit circle
  - Evaluate sine and cosine functions with a calculator
- The Other Trigonometric Ratios on the Unit Circle
  - Find the secant, cosecant, tangent, and cotangent values for angles in the first quadrant of the unit circle
  - Use reference angles to evaluate secant, cosecant, tangent, and cotangent functions
  - Evaluate trigonometric functions with a calculator
- Use Given Trigonometric Ratios to Find Other Ratios
  - Understand the relationship between the quadrant in which an angle falls and the signs of the trig functions of that angle
  - Use the pythagorean identity
  - Find the values of all trigonometric functions given coordinates on a unit circle
  - Find the values of all trigonometric functions given the value of one trigonometric function
