Source	Author(s) (Text or Video)	Title(s)	Link (where applicable)
OpenStax Text	Lynn Marecek, Santa Ana College MaryAnne Anthony-Smith, Formerly of Santa Ana College	Prealgebra	OpenStax
Mathispower4u Video	James Sousa		Mathispower4u Videos

Alta Prealgebra was developed to meet the scope and sequence of a typical one-semester prealgebra course. To develop the course, Knewton used three main sources of content: Openstax, videos created by a Math Professor we have partnered with, and a team of internal and external Subject Matter Experts. The SMEs come from diverse backgrounds and are all academics in the field of mathematics.

Alta Prealgebra has two instructional sequences for every learning objective, giving students multiple opportunities to learn new concepts. Between our OpenStax instructional texts, our videos, and a network of SMEs, we were able to solicit ideas from math instructors and students. Alta Prealgebra covers the typical breadth of prealgebra topics, and also provides the necessary depth to ensure the course is manageable and engaging for instructors and students alike.

Prealgebra | Table of Contents

Chapter 1: Whole Numbers

1.1 Introduction to Whole Numbers

- Place Value and Rounding Whole Numbers
    - Identify whole numbers and counting numbers
    - Model whole numbers and identify the place value of a digit
    - Use place value to name and write whole numbers
    - Round a whole number

1.2 Add Whole Numbers

- Adding Whole Numbers
    - Use addition notation
    - Model addition of whole numbers
    - Add whole numbers without models
    - Add whole numbers that may require carrying
- Applications of Adding Whole Numbers
    - Translate word phrases involving addition to math notation
    - Add whole numbers in applications

1.3 Subtract Whole Numbers

- Subtracting Whole Numbers
    - Use subtraction notation
    - Model subtraction of whole numbers
    - Subtract whole numbers
    - Subtract whole numbers that may require borrowing
- Applications of Subtracting Whole Numbers
    - Translate word phrases involving subtraction to math notation
    - Subtract whole numbers in applications

1.4 Multiply Whole Numbers

- Multiplying Whole Numbers
    - Use multiplication notation
    - Model multiplication of whole numbers
    - Multiply whole numbers by single digit numbers
    - Multiply whole numbers by multi-digit numbers
- Applications of Multiplying Whole Numbers
    - Translate word phrases involving multiplication to math notation
    - Multiply whole numbers in applications

1.5 Divide Whole Numbers

- Dividing Whole Numbers
    - Use division notation
    - Model division of whole numbers
    - Divide whole numbers by single digit numbers
- Dividing Whole Numbers with Long Division
    - Divide whole numbers using long division
    - Divide whole numbers using long division where there may be a remainder
- Applications of Dividing Whole Numbers
    - Translate word phrases involving division to math notation
    - Divide whole numbers in applications

Chapter 2: The Language of Algebra

2.1 Use the Language of Algebra

- Variables, Expressions, and Equations
    - Use variables and algebraic symbols
    - Use variables and algebraic symbols to describe inequalities
    - Identify expressions and equations
- Exponents and Order of Operations
    - Use exponent notation and evaluate exponential expressions involving whole numbers
    - Simplify expressions using the order of operations

2.2 Evaluate, Simplify, and Translate Expressions

- Evaluating and Simplifying Expressions
    - Evaluate algebraic expressions
    - Identify terms, coefficients, and like terms
    - Simplify expressions by combining like terms
- Translating Phrases to Algebraic Expressions
    - Translate word phrases to algebraic expressions
    - Write word phrases from applications as algebraic expressions

2.3 Solving Equations Using the Subtraction and Addition Properties of Equality

- The Subtraction and Addition Properties of Equality
    - Determine whether a number is a solution of an equation
    - Model the Subtraction Property of Equality
    - Solve equations using the Subtraction Property of Equality
    - Solve equations using the Addition Property of Equality
- Translating Phrases to Algebraic Equations and Solving
    - Translate word phrases to algebraic equations
    - Translate to an equation and solve

2.4 Find Multiples and Factors

- Identify Multiples and Use Divisibility Tests
    - Identify multiples of numbers
    - Use common divisibility tests
- Find Factors and Identify Prime and Composite Numbers
    - Find all the factors of a number
    - Identify prime and composite numbers

2.5 Prime Factorization and the Least Common Multiple

- Prime Factorization and the Least Common Multiple
    - Find the prime factorization of a composite number using a factor tree
    - Find the prime factorization of a composite number using the ladder method
    - Find the least common multiple (LCM) of two numbers

Chapter 3: Integers

3.1 Introduction to Integers

- Integers on the Number Line and Opposites
    - Locate positive and negative numbers on the number line (*27)
    - Order positive and negative numbers
    - Find opposites
    - Translate word phrases to expressions with integers
- Introduction to Absolute Value
    - Understand absolute value
    - Simplify expressions using the order of operations with absolute value

3.2 Add Integers

- Adding Integers and Variable Expressions Involving Integers
    - Model addition of integers
    - Simplify expressions involving addition with integers
    - Evaluate variable expressions involving addition with integers
- Adding Integers in Applications
    - Translate word phrases involving addition to algebraic expressions
    - Add integers in applications

3.3 Subtract Integers

- Subtracting Integers and Variable Expressions Involving Integers
    - Model subtraction of integers
    - Simplify expressions involving subtraction with integers
    - Evaluate variable expressions involving subtraction with integers
- Subtracting Integers in Applications
    - Translate word phrases involving subtraction to algebraic expressions
    - Subtract integers in applications

3.4 Multiply and Divide Integers

- Multiplying and Dividing Integers and Variable Expressions with Integers
    - Multiply two integers
    - Divide two integers
    - Simplify expressions involving multiplication or division with integers
    - Evaluate variable expressions involving multiplication or division with integers
- Multiplying and Dividing Integers in Applications
    - Translate word phrases involving multiplication or division to algebraic expressions

3.5 Solve Equations Using Integers and the Division Property of Equality

- The Subtraction and Addition Properties of Equality with Integers
    - Determine whether an integer is a solution of an equation
    - Solve equations with integers using the Addition and Subtraction Properties of Equality
- The Division Property of Equality
    - Model the Division Property of Equality
    - Solve equations using the Division Property of Equality
- Translating Phrases to Algebraic Equations with Integers and Solving
    - Translate to an equation with integers and solve

Chapter 4: Fractions

4.1 Visualize Fractions

- Introduction to Fractions, Improper Fractions, and Mixed Numbers
    - Understand the meaning of fractions
    - Model improper fractions and mixed numbers
    - Convert between improper fractions and mixed numbers
- Finding Equivalent Fractions
    - Model equivalent fractions
    - Find equivalent fractions
- Ordering Fractions and Mixed Numbers
    - Locate fractions and mixed numbers on the number line (*25)
    - Order fractions and mixed numbers

4.2 Multiply and Divide Fractions

- Simplifying and Multiplying Fractions
    - Reduce a fraction to lowest terms
    - Multiply two fractions
- Reciprocals and Dividing Fractions
    - Find reciprocals
    - Divide two fractions

4.3 Multiply and Divide Mixed Numbers and Complex Fractions

- Multiplying and Dividing Mixed Numbers
    - Multiply mixed numbers
    - Divide mixed numbers
- Simplifying Complex Fractions and Order of Operations with Fractions
    - Translate phrases to expressions with fractions
    - Simplify a complex fraction
    - Simplify an expression written with a fraction bar

4.4 Add and Subtract Fractions with Common Denominators

- Adding and Subtracting Fractions with Common Denominators
    - Model fraction addition
    - Add fractions with a common denominator
    - Model fraction subtraction
    - Subtract fractions with a common denominator

4.5 Add and Subtract Fractions with Different Denominators

- Adding and Subtracting Fractions with Different Denominators
    - Find the least common denominator (LCD)
    - Convert fractions to equivalent fractions with the LCD
    - Add and subtract fractions with different denominators
- Combining Fraction Operations
    - Identify and use fraction operations
    - Use the order of operations to simplify complex fractions
    - Evaluate a variable expression with fractions

4.6 Add and Subtract Mixed Numbers

- Adding and Subtracting Mixed Numbers with Common Denominators
    - Model addition of mixed numbers with a common denominator
    - Add mixed numbers with a common denominator
    - Model subtraction of mixed numbers
    - Subtract mixed numbers with a common denominator
- Adding and Subtracting Mixed Numbers with Different Denominators
    - Add and subtract mixed numbers with different denominators

4.7 Solve Equations with Fractions

- Solve Equations with Fractions Using the Addition, Subtraction, and Division Properties of Equality
    - Determine whether a fraction is a solution of an equation
    - Solve equations with fractions using the Addition, Subtraction, and Division Properties of Equality

- Solve Equations with Fractions Using the Multiplication Properties of Equality
    - Solve equations using the Multiplication Property of Equality
    - Solve equations with a fraction coefficient using the Multiplication Property of Equality
    - Translate sentences involving fractions to equations and solve

Chapter 5: Decimals

5.1 Introduction to Decimals

- Naming Decimals and Converting Decimals to Fractions
    - Name decimals
    - Write decimals
    - Convert decimals to fractions or mixed numbers
- Ordering and Rounding Decimals
    - Locate decimals on the number line (*27)
    - Order decimals
    - Round a decimal

5.2 Decimal Operations

- Operations with Decimals
    - Add and subtract two decimals
    - Multiply two decimals
    - Divide decimals by a whole number
    - Divide a decimal by another decimal
- Operations with Decimals in a Money Application
    - Use decimals in money applications

5.3 Decimals and Fractions

- Converting Fractions to Decimals and Order of Operations with Decimals
    - Convert fractions to decimals
    - Order decimals and fractions
    - Simplify expressions involving decimals using the order of operations
- Circumference and Area of Circles
    - Find the circumference and area of circles with pi as a decimal approximation
    - Find the circumference and area of circles with pi as a fractional approximation

5.4 Solve Equations with Decimals

- Solving Equations Involving Decimals
    - Determine whether a decimal is a solution of an equation
    - Solve equations with decimals
    - Translate sentences involving decimals to an equation and solve

5.5 Averages and Probability

- Finding the Mean, Median, and Mode of a Set of Numbers
    - Calculate the mean of a set of numbers
    - Find the median of a set of numbers
    - Find the mode of a set of numbers
- Calculating the Probability of an Event
    - Apply the basic definition of probability

5.6 Ratios and Rate

- Writing Ratios and Using Ratios in Applications
    - Write a ratio as a fraction
    - Use ratios in applications
- Unit Rates and Unit Prices
    - Write a rate as a fraction
    - Find unit rates
    - Find unit price
    - Translate phrases to expressions as rates or ratios

5.7 Simplify and Use Square Roots

- Evaluating, Estimating, and Approximating Square Roots
    - Evaluate square root expressions
    - Estimate square roots
    - Approximate square roots
- Simplifying Square Roots with Variables and Square Roots in Applications
    - Simplify a variable expression with square roots
    - Use a square root in applications

Chapter 6: Percents

6.1 Understand Percent

- Definition of Percent and Converting Percents
    - Use the definition of percent
    - Convert percents to fractions
    - Convert percents to decimals
    - Convert decimals and fractions to percents

6.2 Solve General Applications of Percent

- Percent Equations and Percent Increase and Decrease
    - Translate and solve a basic percent equation
    - Solve applications of percent
    - Find percent increase and percent decrease

6.3 Solve Sales Tax, Commission, and Discount Applications

- Using Percents with Sales Tax, Commission, and Discount Applications
    - Solve sales tax applications
    - Solve commission applications
    - Solve discount applications
    - Solve mark-up applications

6.4 Solve Simple Interest Applications

- Solving Simple Interest Applications
    - Use the simple interest formula
    - Solve a simple interest application

6.5 Solve Proportions and Their Applications

- Proportions and Applications Using Proportions
    - Use the definition of proportion
    - Solve problems involving proportions
    - Solve applications using proportions
- Writing and Solving Percent Proportions
    - Write percent equations as proportions
    - Translate and solve percent proportions

Chapter 7: The Properties of Real Numbers

7.1 Rational and Irrational Numbers

- Classifying Real Numbers
    - Identify rational numbers and irrational numbers
    - Classify different types of real numbers

7.2 Commutative and Associative Properties

- Simplifying Expressions with the Commutative and Associative Properties
    - Use the associative and commutative properties
    - Evaluate expressions using the commutative and associative properties
    - Simplify expressions using the commutative and associative properties
    - Simplify expressions involving fractions or decimals using the commutative and associative properties

7.3 Distributive Property

- Simplifying Expressions with the Distributive Property
    - Use the distributive property to simplify expressions
    - Simplify expressions involving fractions or decimals with the distributive property
    - Simplify expressions using the distributive property where a variable needs distributed
    - Simplify expressions using the distributive property where a negative number needs distributed

- Evaluating Expressions with the Distributive Property
    - Use the distributive property as a step in the order of operations
    - Evaluate expressions using the distributive property

7.4 Properties of Identity, Inverses, and Zero

- Use the Properties of Identity, Inverses, and Zero to Simplify Expressions
    - Recognize the identity properties of addition and multiplication
    - Use the inverse properties of addition and multiplication
    - Use the properties of zero
    - Simplify expressions using the properties of identities, inverses, and zero

7.5 Systems of Measurement

- Unit Conversions in the US System
    - Make a unit conversion in the US system
    - Use mixed units in the US System
- Unit Conversions in the Metric System
    - Make a unit conversion in the metric system
    - Use mixed units in the metric system
- Unit Conversions Between the US and Metric System
    - Convert between the US and the metric systems of measurement
    - Convert between Celsius and Fahrenheit temperatures

Chapter 8: Solving Linear Equations

8.1 Solve Equations Using the Subtraction and Addition Properties of Equality

- Simplifying and Solving Equations Using the Subtraction and Addition Properties of Equality
    - Solve equations using the Subtraction and Addition Properties of Equality
    - Solve equations that need to be simplified using the Subtraction and Addition Properties of Equality
- Solving Application Problems with the Subtraction and Addition Properties of Equality
    - Translate an equation and solve using the Subtraction and Addition Properties of Equality
    - Translate and solve applications using the Subtraction and Addition Properties of Equality

8.2 Solve Equations Using the Division and Multiplication Properties of Equality

- Simplifying and Solving Equations Using the Division and Multiplication Properties of Equality
    - Solve equations using the Division and Multiplication Properties of Equality
    - Solve equations that need to be simplified using the Division and Multiplication Properties of Equality

8.3 Solve Equations with Variables and Constants on Both Sides

- A General Strategy for Solving Equations
    - Solve equations with constants on both sides
    - Solve an equation with variables on each side
    - Solve an equation with variables and constants on both sides
    - Solve equations using a general strategy

8.4 Solve Equations with Fraction or Decimal Coefficients

- Use a General Strategy for Solving Equations with Fractions
    - Solve equations with fraction coefficients
    - Solve equations with fraction coefficients and the distributive property
- Use a General Strategy for Solving Equations with Decimals
    - Solve equations with decimal coefficients
    - Solve equations with decimal coefficients and the distributive property

Chapter 9: Math Models and Geometry

9.1 Use a Problem Solving Strategy

- Introduction to Problem Solving and Number Problems
    - Use a problem solving strategy for word problems
    - Solve number word problems
    - Solve number problems involving multiple numbers
    - Solve number problems involving consecutive integers

9.2 Solve Money Applications

- Solve Problems Involving Coins, Tickets, or Stamps
    - Solve a coin word problem
    - Solve a ticket or stamp word problem

9.3 Use Properties of Angles, Triangles, and the Pythagorean Theorem

- Solve Problems with Angle Measures and Similar Triangles
    - Use the definitions of supplementary and complementary angles to solve problems
    - Find the measures of angles of a triangle using properties
    - Use the properties of similar triangles to solve problems
- Solve Problems with the Pythagorean Theorem
    - Use the Pythagorean Theorem to find the length of a missing side of a right triangle
    - Use the Pythagorean Theorem to solve application problems

9.4 Use Properties of Rectangles, Triangles, and Trapezoids

- Find the Area and Perimeter of Rectangles
    - Understand linear, square, and cubic measure and the definition of area and perimeter
    - Solve problems involving the area and perimeter of rectangles
    - Use the area or perimeter of a rectangle to find the length or width of a rectangle when when one side is given in terms of another
- Find the Area and Perimeter of Triangles
    - Solve problems involving the area and perimeter of triangles
    - Solve problems involving the area and perimeter of isosceles or equilateral triangles

9.5 Solve Geometry Applications with Circles and Irregular Figures

- Find the Area of Trapezoids
    - Use properties of trapezoids

- Area and Circumference of Circles and Area of Irregular Figures
    - Solve problems involving the area and circumference of circles
    - Find the area of irregular figures made from rectangles and triangles
    - Find the area of irregular figures made from circles and other shapes

9.6 Solve Geometry Applications with Volume and Surface Area

- Volume and Surface Area of Rectangular Solids and Spheres
    - Find volume and surface area of rectangular solids and cubes
    - Find volume and surface area of spheres
- Volume and Surface Area of Cylinders and Cones
    - Find volume and surface area of cylinders
    - Find volume of cones

9.7 Solve a Formula for a Specific Variable

- The Distance, Rate, and Time Formula and Solving for a Specific Variable
    - Use the distance, time, and rate formula
    - Solve a given formula for a specific variable
    - Solve a formula for y

Chapter 10: Polynomials

10.1 Add and Subtract Polynomials

- Names and Degrees of Polynomials
    - Identify polynomials, monomials, binomials, and trinomials
    - Determine the degree of polynomials
- Adding, Subtracting, and Evaluating Polynomials
    - Add or subtract monomials
    - Add or subtract polynomials
    - Evaluate a polynomial for a given value

10.2 Use Multiplication Properties of Exponents

- Simplifying Expressions with the Multiplication Properties of Exponents
    - Evaluate numerical expressions with exponents
    - Simplify expressions using the Product Property of Exponents
    - Simplify expressions using the Power Property of Exponents
    - Simplify expressions using the Product to a Power Property
    - Simplify expressions by applying several of the multiplication properties of exponents

10.3 Multiply Polynomials

- Multiplying Polynomials by Monomials
    - Multiply two monomials
    - Multiply a monomial by a polynomial

- Multiplying Binomials and Polynomials
    - Multiply a binomial by a binomial using the distributive property
    - Multiply a binomial by a binomial using the FOIL method
    - Multiply a trinomial by a binomial using the distributive property
- Multiplying Polynomials with the Vertical Method
    - Multiply polynomials using the vertical method

10.4 Divide Monomials

- Simplifying Expressions with the Division Properties of Exponents and Dividing Monomials
    - Simplify expressions using the Quotient Property of Exponents and the Zero Property of Exponents
    - Simplify an expression using the Quotient to a Power Property
    - Simplify expressions by applying several properties of exponents
    - Divide two monomials

10.5 Integer Exponents and Scientific Notation

- Integer Exponents
    - Use the definition of negative exponents
    - Simplify an expression with integer exponents
- Scientific Notation and Operations with Scientific Notation
    - Convert decimal notation to scientific notation
    - Convert scientific notation to decimal form
    - Multiply or divide using scientific notation

10.6 Introduction to Factoring Polynomials

- Greatest Common Factors of Monomials and Polynomials
    - Find the greatest common factor of the given expressions
    - Factor the greatest common factor out of a polynomial
    - Factor a greatest common factor with a negative coefficient from a polynomial

Chapter 11: Graphs

11.1 Use the Rectangular Coordinate System

- Plotting Points on a Rectangular Coordinate System
    - Plot points in a rectangular coordinate system (*44)
    - Identify the quadrants of points and plot points with a coordinate of zero (*25)
    - Identify points on a graph
- Solutions of Linear Equations
    - Verify solutions to an equation in two variables
    - Complete a table of solutions to a linear equation
    - Find solutions to linear equations in two variables

11.2 Graphing Linear Equations

- Graph Linear Equations and Vertical and Horizontal Lines by Plotting Points
    - Recognize the relation between the solutions of an equation and its graph
    - Graph a line by plotting points (*24)
    - Graph a linear equation with x and y on the same side by plotting points (*23)
    - Graph vertical or horizontal lines (*25)

11.3 Graphing with Intercepts

- Graph Linear Equations with Intercepts
    - Identify the intercepts on a graph
    - Find the intercepts from an equation of a line
    - Graph a line using the intercepts (*24)
    - Choose the most convenient method to graph a line

11.4 Understand Slope of a Line

- Understanding Slope
    - Use geoboards to model slope (*13)
    - Find the slope of a line from its graph
    - Find the slope of horizontal or vertical lines
- Graphing Lines with Slope and Applications of Slope
    - Find the slope of a line between two points by using the slope formula
    - Graph lines given a point and the slope (*23)
    - Solve slope applications
