

Intermediate Algebra | Table of Contents

Chapter 1: Foundations

1.1 Use the Language of Algebra

- Prime Factorization, Algebraic Symbols, and Order of Operations
 - Find factors, prime factorizations, and least common multiples (20)
 - Use algebraic symbols and variables (20)
 - Simplify expressions with grouping symbols and exponents using order of operations
- Simplifying and Rewriting Algebraic Expressions
 - Evaluate an expression involving exponents and order of operations
 - Identify and combine like terms
 - Translate an English phrase and word problems into an algebraic expression (40)

1.2 Integers

- Absolute Value and Operations on Integers
 - Understand absolute value and simplify expressions involving absolute value with order of operations (40)
 - Add and subtract integers (40)
 - Multiply and divide integers (40)
- Algebraic Expressions with Integers
 - Simplify expressions with integers
 - Evaluate variable expressions with integers (20)
 - Translate an English phrase and word problems involving integers into an algebraic expression (39)

1.3 Fractions

- Operations on Fractions
 - Simplify fractions
 - Multiply and divide fractions (20, 20)
 - Add and subtract fractions
- Algebraic Expressions with Fractions
 - Use the order of operations to simplify fractions
 - Evaluate variable expressions involving fractions

1.4 Decimals

- Operations on Decimals and Understanding Percents
 - Name and round decimals (20, 20)
 - Evaluate expressions by adding and subtracting decimals (40)
 - Multiply and divide decimals (20, 20)
 - Convert between decimals, fractions, and percents

1.5 Properties of Real Numbers

- Square Roots and the Real Number System
 - Evaluate square roots
 - Identify integers, rational numbers, irrational numbers, and real numbers (20)
 - Locate fractions and decimals on the number line
-

- Using the Properties of Real Numbers
 - Understand and use the commutative and associative properties
 - Use the properties of identity, inverse, and zero (40)
 - Simplify an expression using the distributive property (40)

Chapter 2: Solving Linear Equations and Inequalities

2.1 Use a General Strategy to Solve Linear Equations

- Solving Linear Equations in One Variable
 - Determine if a value is the solution to an equation (20)
 - Use a general strategy to solve a linear equation (20)
 - Determine if an equation is a contradiction, identity, or conditional equation (40)
- Solving Linear Equations with Fraction and Decimal Coefficients
 - Solve an equation with fractional coefficients (20)
 - Solve an equation with decimal coefficients (20)

2.2 Use a Problem Solving Strategy

- An Introduction to Problem Solving
 - Develop a problem-solving strategy for word problems
 - Solve number word problems (20)
- Percent Change and Interest Applications
 - Solve percent application problems (20)
 - Solve problems involving percent change (40)
 - Solve simple interest applications

2.3 Solve a Formula for a Specific Variable

- Literal Equations and Using Formulas with Geometry
 - Solve a formula for a specified variable
 - Use a formula to solve a geometric application
 - Use the Pythagorean theorem

2.4 Solve Mixture and Uniform Motion Applications

- Mixture Problems with Coins, Tickets, or Stamps
 - Solve a word problem involving coins
 - Solve a word problem involving tickets or stamps
- Mixture Word Problems and Uniform Motion
 - Solve a mixture word problem
 - Solve applications involving uniform motion

2.5 Solve Linear Inequalities

- Solving Linear Inequalities
 - Graph an inequality on a number line and use interval notation
 - Solve a linear inequality that requires only one step
 - Solve a linear inequality that requires multiple steps to solve
 - Translate words to an inequality and solve applications with linear inequalities
-

2.6 Solve Compound Inequalities

- Solving Compound Inequalities
 - Solve a compound inequality involving intersections
 - Solve a compound inequality involving unions
 - Solve applications with compound inequalities

2.7 Solve Absolute Value Equations and Inequalities

- Solving Absolute Value Equations and Inequalities
 - Solve an absolute value equation (20)
 - Solve an absolute value inequality involving "less than" (40)
 - Solve an absolute value inequality involving "greater than"
 - Solve applications with absolute value (40)

Chapter 3: Graphs and Functions

3.1 Graph Linear Equations in Two Variables

- The Rectangular Coordinate System and Graphing Linear Equations
 - Plot points on the rectangular coordinate system and identify the quadrants of points
 - Understand the standard form of a linear equation and verify solutions given points
 - Graph linear equations by plotting points
 - Graph horizontal and vertical lines
- Graphing Linear Equations with Intercepts
 - Find the intercepts of a line from a graph or an equation (20)
 - Graph a line using intercepts

3.2 Slope of a Line

- The Slope of a Line
 - Find the slope of a line using the relationship between rise and run
 - Find the slope of a line given two points on the line (20)
- Graphing Linear Equations with Slope
 - Graph a line given the slope and a point (*57)
 - Identify the slope and intercept of a line from its equation and use it to graph the line (*37)
 - Graph a linear equation using a variety of methods
- Applications of Slope and Parallel and Perpendicular Lines
 - Interpret applications using graphs and slope
 - Determine if two lines are parallel or perpendicular by comparing slopes (20, 20)

3.3 Find the Equation of a Line

- Equations of Lines
 - Find the equation of a line given the y-intercept and the slope (20)
 - Find the equation of a line given a point on the line and the slope (20)
 - Find the equation of a line given two points on the line (20)
 - Equations of Parallel and Perpendicular Lines
 - Find the equation of a line parallel to a given line (20)
 - Find the equation of a line perpendicular to a given line (20)
-

3.4 Graph Linear Inequalities in Two Variables

- Graphing Linear Inequalities
 - Verify that a given point is a solution to an inequality in two variables (20)
 - Write a linear inequality given its graph
 - Graph a linear inequality in two variables
 - Solve applications using linear inequalities in two variables (20)

3.5 Relations and Functions

- Introduction to Functions
 - Find the domain and range of a relation (20)
 - Determine if a relation is a function given a set of ordered pairs or a mapping (20)
 - Determine if a relation is a function given an equation (20)
- Function Notation
 - Use function notation to find the value of a function given a number (20)
 - Use function notation to find the value of a function given a variable expression (20)

3.6 Graphs of Functions

- The Vertical Line Test and Graphs of Functions
 - Use the vertical line test to determine if a graph represents a function
 - Identify graphs of basic functions
 - Read information from the graph of a function

3.7 Linear Regressions

- Linear Regressions
 - Find the line of best fit using a graphing utility
 - Use the line of best fit to make predictions

Chapter 4: Systems of Linear Equations and Inequalities

4.1 Solve Systems of Linear Equations with Two Variables

- Solving Systems of Linear Equations in Two Variables by Graphing
 - Determine if an ordered pair is a solution of a system of linear equations
 - Solve systems of linear equations by graphing
 - Identify inconsistent and dependent systems of equations with two variables (20)
- Solving Systems of Linear Equations in Two Variables Algebraically
 - Solve a system of linear equations using the substitution method
 - Solve a system of linear equations using the elimination method
 - Choose the most convenient method to solve a system of linear equations (20)

4.2 Solve Applications with Systems of Equations

- Systems of Linear Equations in Two Variables and Problem Solving
 - Solve word problems and applications using a system of linear equations
 - Solve geometric application problems using systems of equations
 - Solve applications of uniform motion using systems of equations

4.3 Solve Mixture Applications with Systems of Equations

- Mixture Problems and Systems of Linear Equations in Two Variables
 - Solve applications of mixture involving tickets or money with a system of linear equations
 - Solve applications of mixture involving concentrations using a system of linear equations
 - Solve applications involving the simple interest formula using a system of linear equations
 - Solve applications of cost and revenue functions using a system of linear equations

4.4 Solve Systems of Equations with Three Variables

- Solving Systems of Linear Equations in Three Variables
 - Determine whether an ordered triple is a solution of a system of three linear equations with three variables (20)
 - Solve a system of linear equations with three variables (20)
 - Identify inconsistent and dependent systems of equations with three variables (20)
 - Solve applications using systems of linear equations in three variables

4.5 Solve Systems of Equations Using Matrices

- Solving Systems of Linear Equations with Matrix Row Operations
 - Write the augmented matrix for a system of equations
 - Use row operations on a matrix (20)
 - Solve a system of equations using matrices (20)

4.6 Solve Systems of Equations Using Determinants

- Determinants of Matrices
 - Evaluate the determinant of a 2×2 matrix (20)
 - Evaluate the minor of an element in a 3×3 matrix (20)
 - Evaluate the determinant of a 3×3 matrix (20)
- Solving Systems of Linear Equations with Cramer's Rule and Determinants
 - Use Cramer's Rule to solve systems of equations in two variables (20)
 - Use Cramer's Rule to solve systems of equations in three variables (20)
 - Use determinants to determine if three given points are collinear (20)

4.7 Graphing Systems of Linear Inequalities

- Solving Systems of Linear Inequalities
 - Determine if an ordered pair is a solution of a system of linear inequalities
 - Solve systems of linear inequalities by graphing
 - Solve an application using systems of linear inequalities

Chapter 5: Polynomials and Polynomial Functions

5.1 Add and Subtract Polynomials

- Adding and Subtracting Polynomials and Polynomial Functions
 - Determine the degree and type of a given polynomial and write it in standard form (20, 20)
 - Add or subtract polynomial expressions (20)
 - Evaluate a polynomial function for a given value (20)
 - Add or subtract polynomial functions (20)

5.2 Properties of Exponents and Scientific Notation

- Simplifying Expressions with Properties of Exponents and Negative Exponents
 - Use the product property of exponents to simplify expressions (20)
 - Use the quotient property and the zero property of exponents to simplify expressions (20)
 - Rewrite expressions with positive exponents using the definition of negative exponents (40)
-

- Use the power property for exponents and extensions to products and quotients to simplify expressions (40)
- Simplify exponential expressions by combining all properties (40)
- Scientific Notation
 - Convert between decimal notation and scientific notation (20, 20)
 - Multiply and divide expressions given in scientific notation (20, 20)

5.3 Multiply Polynomials

- Multiplying Polynomials
 - Multiply monomials and multiply a polynomial by a monomial (20, 20)
 - Multiply two binomials (20)
 - Multiply a polynomial by a polynomial (20)
- Special Products of Binomials and Multiplying Polynomial Functions
 - Use the binomial squares pattern to square a binomial (20)
 - Use the conjugate pairs pattern to multiply conjugates (20)
 - Multiply polynomial functions (20)

5.4 Dividing Polynomials

- Dividing Polynomials and Polynomial Functions
 - Divide monomials and divide a polynomial by a monomial
 - Use polynomial long division to divide polynomials (20)
 - Divide polynomial functions (20)
- Synthetic Division and the Remainder and Factor Theorems
 - Use synthetic division to divide polynomials (20)
 - Use the remainder and factor theorems (20, 20)

Chapter 6: Factoring

6.1 Greatest Common Factor and Factor by Grouping

- The Greatest Common Factor and Factoring by Grouping
 - Find the greatest common factor of monomial expressions (20)
 - Factor the greatest common factor from polynomial expressions (20)
 - Factor polynomials by grouping (20)

6.2 Factor Trinomials

- Factoring Trinomials
 - Factor a trinomial with a leading coefficient of 1 (20)
 - Factor a trinomial with a leading coefficient of greater than 1 using trial and error (20)
 - Factor a trinomial with a leading coefficient of greater than 1 using the 'ac' method (20)
 - Factor a trinomial in a quadratic form using substitution (40)

6.3 Factor Special Products

- Factoring Special Products
 - Factor polynomials using a perfect squares binomial pattern (20)
 - Factor polynomials using a difference of squares pattern (20)
 - Factor polynomials by combining the difference of squares and perfect square trinomial patterns
 - Factor a sum or a difference of cubes (20, 20)
-

6.4 General Strategy for Factoring Polynomials

- Choosing a Factoring Strategy
 - Use a general strategy for factoring polynomials (40)

6.5 Polynomial Equations

- Solving Polynomial Equations by Factoring
 - Use the zero product property to solve a factored polynomial equation (20)
 - Solve polynomial equations by factoring (20, 17)
 - Find zeros and intercepts of a polynomial function by factoring (40)
 - Use factoring to solve application problems involving polynomial equations (40)

Chapter 7: Rational Expressions and Functions

7.1 Multiply and Divide Rational Expressions

- Domain of Rational Expressions and Simplifying Rational Expressions
 - Determine which values make a rational expression undefined (20)
 - Simplify rational expressions
- Multiplying and Dividing Rational Expressions
 - Multiply two rational expressions
 - Divide rational expressions, including those written as complex fractions
 - Multiply and divide rational functions

7.2 Add and Subtract Rational Expressions

- Adding and Subtracting Rational Expressions
 - Add or subtract rational expressions with a common denominator or with denominators that are opposites
 - Determine the least common denominator of rational expressions (20)
 - Add or subtract rational expressions with unlike denominators (20)
 - Add and subtract rational functions (20)

7.3 Simplify Complex Rational Expressions

- Simplifying Complex Rational Expressions
 - Simplify complex rational expressions by writing the expression as division (20)
 - Simplify complex rational expressions by using the least common denominator

7.4 Solve Rational Equations

- Solving Rational Equations and Using Rational Functions
 - Solve rational equations (40)
 - Use rational equations to find points on the graph of a rational function (40)
 - Rewrite a rational equation in terms of a specific variable (40)

7.5 Solve Applications with Rational Equations

- Proportions and Similar Figures with Rational Equations
 - Solve problems involving proportions
 - Solve application problems involving similar figures
 - Uniform Motion, Work, and Problem Solving
 - Use rational equations to solve uniform motion applications
 - Use rational equations to solve problems involving rates of work
 - Variation and Problem Solving
-

- Solve problems involving direct variation
- Solve problems involving inverse variation

7.6 Solve Rational Inequalities

- Solving Rational Inequalities
 - Find the solution set of a rational inequality
 - Solve an inequality with rational functions (40)

Chapter 8: Roots and Radicals

8.1 Simplify Expressions with Roots

- Understanding Radical Expressions
 - Simplify a numerical expression with even or odd roots
 - Estimate and approximate roots (20)
 - Simplify a variable expression with even or odd roots (20)

8.2 Simplify Radical Expressions

- Simplifying Radical Expressions
 - Use the product property to simplify radical expressions
 - Use the quotient property to simplify radical expressions

8.3 Simplify Rational Exponents

- Rational Exponents
 - Simplify an expression with rational exponents and a numerator of 1 (20)
 - Simplify an expression with rational exponents and a numerator greater than 1 (20)
 - Use the properties of exponents to simplify expressions with rational exponents (40)

8.4 Add, Subtract, and Multiply Radical Expressions

- Operations with Radical Expressions
 - Add and subtract radical expressions
 - Multiply radical expressions (40)
 - Use polynomial multiplication to multiply radical expressions (20)
 - Use special product formulas to multiply radical expressions (20, 20)

8.5 Divide Radical Expressions

- Dividing Radical Expressions and Rationalizing Denominators
 - Divide radical expressions (20)
 - Rationalize a denominator when the denominator is a monomial
 - Rationalize a denominator when the denominator is a binomial (20)

8.6 Solve Radical Equations

- Solving Radical Equations
 - Solve square root equations containing a single radical (20)
 - Solve a radical equation with a single radical or an equation with a rational exponent (20)
 - Solve a radical equation with two radicals (20)
 - Solve application problems involving radical equations

8.7 Use Radicals in Functions

- Radical Functions
 - Evaluate a radical function (20)
 - Find the domain of a radical function
-

- Graph a radical function by plotting points and determine its range

8.8 Use the Complex Number System

- Introduction to Complex Numbers
 - Evaluate the square root of a negative number and understand the complex number system (20)
 - Add or subtract complex numbers (20)
- Multiplying and Dividing Complex Numbers and Powers of i
 - Multiply complex numbers (20)
 - Multiply two complex conjugates (20)
 - Divide complex numbers (20)
 - Simplify powers of i (20)

Chapter 9: Quadratic Equations and Functions

9.1 Solve Quadratic Equations Using the Square Root Property

- Solving Quadratic Equations Using the Square Root Property
 - Solve quadratic equations using the square root property (20)
 - Solve quadratic equations with a binomial as the quadratic term using the square root property (20)

9.2 Solve Quadratic Equations by Completing the Square

- Solving Quadratic Equations by Completing the Square
 - Find the term that completes the square of a quadratic expression (20)
 - Solve quadratic equations with a leading coefficient of 1 by completing the square (20)
 - Solve quadratic equations with a leading coefficient greater than 1 by completing the square (20)

9.3 Solve Quadratic Equations Using the Quadratic Formula

- Solving Quadratic Equations Using the Quadratic Formula
 - Solve quadratic equations using the quadratic formula with two real solutions (20)
 - Solve quadratic equations using the quadratic formula with one or no real solutions (20, 20)
 - Determine the number and type of solutions of a quadratic equation by using the discriminant (20)

9.4 Solve Quadratic Equations in Quadratic Form

- Solving Equations by Using Quadratic Methods
 - Solve an equation in quadratic form by using substitution (40)
 - Solve an equation in quadratic form with rational or negative exponents by using substitution (40)

9.5 Solve Applications of Quadratic Equations

- Problem Solving with Quadratic Equations
 - Solve an application problem modeled by a quadratic equation
 - Solve a geometric application problem where the quadratic formula may be required

9.6 Graph Quadratic Functions Using Properties

- Parabolas and Their Properties
-

- Graph a quadratic function by plotting points and determine the direction a parabola opens
- Determine the axis of symmetry and vertex of a parabola given a function (20)
- Determine the intercepts of a parabola given a function (20)
- Graphing Quadratic Functions
 - Graph a quadratic function by finding key points
 - Determine the minimum or maximum of a quadratic function and use it in applications (40)

9.7 Graph Quadratic Functions Using Transformations

- Transformations of Parabolas
 - Graph a quadratic function using a vertical translation
 - Graph a quadratic function using a horizontal translation
 - Graph a quadratic function by compression, stretching, or reflecting
- Graphing Quadratic Functions Using Transformations
 - Rewrite a quadratic in vertex form and graph it using transformations
 - Find a quadratic function given its graph

9.8 Solve Quadratic Inequalities

- Solving Quadratic Inequalities
 - Solve a quadratic inequality graphically
 - Solve a quadratic inequality algebraically (40)

9.9 Quadratic Regressions

- Quadratic Regressions
 - Find the parabola of best fit using a graphing utility
 - Use a parabola of best fit to make predictions

Chapter 10: Exponential and Logarithmic Functions

10.1 Finding Composite and Inverse Functions

- Composite Functions
 - Perform a composition of functions (20)
 - Evaluate a composition of functions for a specific value (20)
- One-to-One Functions
 - Determine whether a function is one-to-one given a set of ordered pairs
 - Use the horizontal line test to determine whether a graph represents a one-to-one function
- Inverse Functions
 - Find the inverse of a function given a set of ordered pairs or a graph (40)
 - Verify that two functions are inverses of each other (40)
 - Find the inverse of a function algebraically (40)

10.2 Evaluate and Graph Exponential Functions

- Graphing Exponential Functions
 - Graph an exponential function and understand its properties
 - Graph an exponential function using transformations
 - Evaluate an exponential function with base e and understand the natural base (40)
 - Applications with Exponential Functions
-

- Use the one-to-one property of exponential equations to solve an exponential equation (40)
- Use the compound interest formula to find the new value of an account (40)
- Use the continuously compounding interest formula to find the new value of an account (40)
- Calculate resultant values using exponential growth and decay models (40)

10.3 Evaluate and Graph Logarithmic Functions

- Introduction to Logarithms
 - Convert between exponential and logarithmic form (20, 20)
 - Evaluate a logarithmic function (20)
- Logarithmic Functions and Applications
 - Graph a logarithmic function and understand its properties
 - Solve a logarithmic equation by rewriting the equation in exponential form (20)
 - Use logarithmic models in applications (40)

10.4 Use the Properties of Logarithms

- Understanding the Properties of Logarithms
 - Use basic properties of logarithms and the inverse properties of logarithms (40)
 - Use the product, quotient, and power properties of logarithms (40)
- Using the Properties of Logarithms
 - Use the properties of logarithms to expand a logarithmic expression (40)
 - Use the properties of logarithms to condense a logarithmic expression (40)
 - Use the change-of-base formula for logarithms (20)

10.5 Solve Exponential and Logarithmic Equations

- Solving Logarithmic Equations
 - Use the one-to-one property of logarithmic equations to solve logarithmic equations (40)
 - Use the properties of logarithms to solve logarithmic equations (40)
- Solving Exponential Equations and Applications
 - Solve exponential equations using logarithms (40)
 - Solve for amounts other than a new balance with the compound or continuously compounding interest formula (40)
 - Use the exponential growth and decay models to find values other than the resultant value (40)

10.6 Exponential and Logarithmic Regressions

- Exponential and Logarithmic Regressions
 - Build an exponential model from data using a graphing utility
 - Build a logarithmic model from data using a graphing utility

Chapter 11: Conics

11.1 Distance and Midpoint Formulas and Circles

- The Distance and Midpoint Formulas
 - Use the distance formula to find the distance between two points (20)
 - Use the midpoint formula to find the midpoint between two points
-

- The Equation of Circles
 - Write the standard form of the equation of a circle given its center and radius (20)
 - Write the standard form of the equation of a circle given its center and a point on the circle (20)
 - Graph a circle given its equation in standard form
 - Rewrite the equation of a circle given in general form by completing the square

11.2 Parabolas

- Parabolas as Conic Sections and Applications
 - Graph a vertical parabola given the equation in general or standard form
 - Graph a horizontal parabola given the equation in general form
 - Graph a horizontal parabola given the equation in standard form
 - Solve applications with parabolas

11.3 Ellipses

- Ellipses with Centers at the Origin
 - Graph an ellipse with its center at the origin
 - Find the equation of an ellipse with its center at the origin
- Ellipses with Centers Not at the Origin and Applications
 - Graph an ellipse with its center not at the origin
 - Rewrite the equation of an ellipse given in general form by completing the square
 - Solve applications with ellipses

11.4 Hyperbolas

- Hyperbolas as Conic Sections
 - Graph a hyperbola with its center at the origin
 - Graph a hyperbola with its center not at the origin
 - Rewrite the equation of a hyperbola given in general form by completing the square
- Identifying Conic Sections by Their Equations
 - Identify conic sections by their equations

11.5 Solve Systems of Nonlinear Equations

- Solving Systems of Nonlinear Equations
 - Solve a system of nonlinear equations by graphing
 - Solve a system of nonlinear equations using substitution (40)
 - Solve a system of nonlinear equations using elimination (40)
- Problem Solving with Systems of Nonlinear Equations
 - Use a system of nonlinear equations to solve applications (40)

Chapter 12: Sequences, Series, and the Binomial Theorem

12.1 Sequences

- Introduction to Sequences
 - Write the first few terms of a sequence (20)
 - Find a formula for the general term of a sequence (20)
 - Factorial Notation and Sigma Notation
 - Use factorial notation (20)
 - Find the partial sum (20)
-

- Use summation notation to write a sum (20)

12.2 Arithmetic Sequences and Series

- Arithmetic Sequences and Series
 - Determine if a sequence is arithmetic and write the first few terms of an arithmetic sequence (20)
 - Find the general term of an arithmetic sequence (20)
 - Find the sum of the first n terms of an arithmetic sequence (20)

12.3 Geometric Sequences and Series

- Geometric Sequences
 - Determine if a sequence is geometric and write the first few terms of a geometric sequence (20)
 - Find the general term of a geometric sequence (20)
- Finite and Infinite Geometric Series and Applications
 - Find the sum of the first n terms of a geometric sequence (20)
 - Find the sum of an infinite geometric series and use infinite geometric series to write a repeating decimal as a fraction (20, 20)
 - Use geometric sequences and series to solve monetary applications including annuities (40)

12.4 Binomial Theorem

- The Binomial Theorem
 - Use Pascal's Triangle to expand a binomial (20)
 - Evaluate a binomial coefficient (20)
 - Use the binomial theorem to expand a binomial (20)
-
