

## Prealgebra | Table of Contents

### Chapter 1 - Whole Numbers

#### 1.1 - Introduction to Whole Numbers

- Place Value and Rounding Whole Numbers
  - Identify whole numbers and counting numbers (20)
  - Model whole numbers and identify the place value of a digit
  - Use place value to name and write whole numbers (20)
  - Round a whole number (20)

#### 1.2 - Add Whole Numbers

- Adding Whole Numbers
  - Use addition notation (20)
  - Model addition of whole numbers
  - Add whole numbers without models
  - Add whole numbers that may require carrying (20)
- Applications of Adding Whole Numbers
  - Translate word phrases involving addition to math notation (20)
  - Add whole numbers in applications

#### 1.3 - Subtract Whole Numbers

- Subtracting Whole Numbers
  - Use subtraction notation (20)
  - Model subtraction of whole numbers
  - Subtract whole numbers
  - Subtract whole numbers that may require borrowing (20)
- Applications of Subtracting Whole Numbers
  - Translate word phrases involving subtraction to math notation (20)
  - Subtract whole numbers in applications (20)

#### 1.4 - Multiply Whole Numbers

- Multiplying Whole Numbers
    - Use multiplication notation (20)
    - Model multiplication of whole numbers
    - Multiply whole numbers by single digit numbers (20)
    - Multiply whole numbers by multi-digit numbers (20)
  - Applications of Multiplying Whole Numbers
    - Translate word phrases involving multiplication to math notation (20)
    - Multiply whole numbers in applications (20)
-

### 1.5 - Divide Whole Numbers

- Dividing Whole Numbers
  - Use division notation (20)
  - Model division of whole numbers
  - Divide whole numbers by single digit numbers (20)
- Dividing Whole Numbers with Long Division
  - Divide whole numbers using long division (20)
  - Divide whole numbers using long division where there may be a remainder (20)
- Applications of Dividing Whole Numbers
  - Translate word phrases involving division to math notation (20)
  - Divide whole numbers in applications (20)

## Chapter 2 - The Language of Algebra

### 2.1 - Use the Language of Algebra

- Variables, Expressions, and Equations
  - Use variables and algebraic symbols (20)
  - Use variables and algebraic symbols to describe inequalities (20)
  - Identify expressions and equations (20)
- Exponents and Order of Operations
  - Use exponent notation and evaluate exponential expressions involving whole numbers (20)
  - Simplify expressions using the order of operations (20)

### 2.2 - Evaluate, Simplify, and Translate Expressions

- Evaluating and Simplifying Expressions
  - Evaluate algebraic expressions (20)
  - Identify terms, coefficients, and like terms (20, 20, 20)
  - Simplify expressions by combining like terms (20)
- Translating Phrases to Algebraic Expressions
  - Translate word phrases to algebraic expressions (20)
  - Write word phrases from applications as algebraic expressions (20)

### 2.3 - Solving Equations Using the Subtraction and Addition Properties of Equality

- The Subtraction and Addition Properties of Equality
    - Determine whether a number is a solution of an equation (20)
    - Model the Subtraction Property of Equality
    - Solve equations using the Subtraction Property of Equality (20)
    - Solve equations using the Addition Property of Equality (20)
  - Translating Phrases to Algebraic Equations and Solving
    - Translate word phrases to algebraic equations (20)
    - Translate to an equation and solve (20)
-

#### 2.4 - Find Multiples and Factors

- Identify Multiples and Use Divisibility Tests
  - Identify multiples of numbers (20)
  - Use common divisibility tests (20)
- Find Factors and Identify Prime and Composite Numbers
  - Find all the factors of a number (20)
  - Identify prime and composite numbers (20)

#### 2.5 - Prime Factorization and the Least Common Multiple

- Prime Factorization and the Least Common Multiple
  - Find the prime factorization of a composite number using a factor tree
  - Find the prime factorization of a composite number using the ladder method (20)
  - Find the least common multiple (LCM) of two numbers

### **Chapter 3 - Integers**

#### 3.1 - Introduction to Integers

- Integers on the Number Line and Opposites
  - Locate positive and negative numbers on the number line
  - Order positive and negative numbers
  - Find opposites (20)
  - Translate word phrases to expressions with integers
- Introduction to Absolute Value
  - Understand absolute value
  - Simplify expressions using the order of operations with absolute value

#### 3.2 - Add Integers

- Adding Integers and Variable Expressions Involving Integers
  - Model addition of integers
  - Add two integers (20)
  - Simplify expressions involving addition with integers (20)
  - Evaluate variable expressions involving addition with integers (20)
- Adding Integers in Applications
  - Translate word phrases involving addition to algebraic expressions (20)
  - Add integers in applications (20)

#### 3.3 - Subtract Integers

- Subtracting Integers and Variable Expressions Involving Integers
    - Model subtraction of integers
    - Subtract two integers (20)
    - Simplify expressions involving subtraction with integers (20)
    - Evaluate variable expressions involving subtraction with integers (20)
  - Subtracting Integers in Applications
-

- Translate word phrases involving subtraction to algebraic expressions (20)
- Subtract integers in applications (20)

### 3.4 - Multiply and Divide Integers

- Multiplying and Dividing Integers and Variable Expressions with Integers
  - Multiply two integers
  - Divide two integers
  - Simplify expressions involving multiplication or division with integers
  - Evaluate variable expressions involving multiplication or division with integers (20)
- Multiplying and Dividing Integers in Applications
  - Translate word phrases involving multiplication or division to algebraic expressions (20)

### 3.5 - Solve Equations Using Integers and the Division Property of Equality

- The Subtraction and Addition Properties of Equality with Integers
  - Determine whether an integer is a solution of an equation (20)
  - Solve equations with integers using the Addition and Subtraction Properties of Equality
- The Division Property of Equality
  - Model the Division Property of Equality
  - Solve equations using the Division Property of Equality (20)
- Translating Phrases to Algebraic Equations with Integers and Solving
  - Translate to an equation with integers and solve (20)

## Chapter 4 - Fractions

### 4.1 - Visualize Fractions

- Introduction to Fractions, Improper Fractions, and Mixed Numbers
  - Understand the meaning of fractions
  - Model improper fractions and mixed numbers
  - Convert between improper fractions and mixed numbers (20, 20)
- Finding Equivalent Fractions
  - Model equivalent fractions
  - Find equivalent fractions (20)
- Ordering Fractions and Mixed Numbers
  - Locate fractions and mixed numbers on the number line
  - Order fractions and mixed numbers

### 4.2 - Multiply and Divide Fractions

- Simplifying and Multiplying Fractions
    - Reduce a fraction to lowest terms
    - Multiply two fractions (20)
  - Reciprocals and Dividing Fractions
    - Find reciprocals (20)
    - Divide two fractions (20)
-

#### 4.3 - Multiply and Divide Mixed Numbers and Complex Fractions

- Multiplying and Dividing Mixed Numbers
  - Multiply mixed numbers (20)
  - Divide mixed numbers (20)
- Simplifying Complex Fractions and Order of Operations with Fractions
  - Translate phrases to expressions with fractions
  - Simplify a complex fraction (20)
  - Simplify an expression written with a fraction bar

#### 4.4 - Add and Subtract Fractions with Common Denominators

- Adding and Subtracting Fractions with Common Denominators
  - Model fraction addition
  - Add fractions with a common denominator (20)
  - Model fraction subtraction
  - Subtract fractions with a common denominator (20)

#### 4.5 - Add and Subtract Fractions with Different Denominators

- Adding and Subtracting Fractions with Different Denominators
  - Find the least common denominator (LCD)
  - Convert fractions to equivalent fractions with the LCD (20)
  - Add and subtract fractions with different denominators
- Combining Fraction Operations
  - Identify and use fraction operations
  - Use the order of operations to simplify complex fractions
  - Evaluate a variable expression with fractions

#### 4.6 - Add and Subtract Mixed Numbers

- Adding and Subtracting Mixed Numbers with Common Denominators
  - Model addition of mixed numbers with a common denominator
  - Add mixed numbers with a common denominator (20)
  - Model subtraction of mixed numbers
  - Subtract mixed numbers with a common denominator (20)
- Adding and Subtracting Mixed Numbers with Different Denominators
  - Add and subtract mixed numbers with different denominators

#### 4.7 - Solve Equations with Fractions

- Solve Equations with Fractions Using the Addition, Subtraction, and Division Properties of Equality
    - Determine whether a fraction is a solution of an equation
    - Solve equations with fractions using the Addition, Subtraction, and Division Properties of Equality (20)
-

- Solve Equations with Fractions Using the Multiplication Properties of Equality
  - Solve equations using the Multiplication Property of Equality (20)
  - Solve equations with a fraction coefficient using the Multiplication Property of Equality (20)
  - Translate sentences involving fractions to equations and solve

## **Chapter 5 - Decimals**

### 5.1 - Introduction to Decimals

- Naming Decimals and Converting Decimals to Fractions
  - Name decimals (20)
  - Write decimals (20)
  - Convert decimals to fractions or mixed numbers
- Ordering and Rounding Decimals
  - Locate decimals on the number line
  - Order decimals (20)
  - Round a decimal (20)

### 5.2 - Decimal Operations

- Operations with Decimals
  - Add and subtract two decimals
  - Multiply two decimals (20)
  - Divide decimals by a whole number
  - Divide a decimal by another decimal (20)
- Operations with Decimals in a Money Application
  - Use decimals in money applications

### 5.3 - Decimals and Fractions

- Converting Fractions to Decimals and Order of Operations with Decimals
  - Convert fractions to decimals (20)
  - Order decimals and fractions
  - Simplify expressions involving decimals using the order of operations
- Circumference and Area of Circles
  - Find the circumference and area of circles with pi as a decimal approximation (20)
  - Find the circumference and area of circles with pi as a fractional approximation (20)

### 5.4 - Solve Equations with Decimals

- Solving Equations Involving Decimals
    - Determine whether a decimal is a solution of an equation (20)
    - Solve equations with decimals (20)
    - Translate sentences involving decimals to an equation and solve
-

### 5.5 - Averages and Probability

- Finding the Mean, Median, and Mode of a Set of Numbers
  - Calculate the mean of a set of numbers (20)
  - Find the median of a set of numbers (20)
  - Find the mode of a set of numbers (20)
- Calculating the Probability of an Event
  - Apply the basic definition of probability

### 5.6 - Ratios and Rate

- Writing Ratios and Using Ratios in Applications
  - Write a ratio as a fraction (20)
  - Use ratios in applications
- Unit Rates and Unit Prices
  - Write a rate as a fraction
  - Find unit rates
  - Find unit price
  - Translate phrases to expressions as rates or ratios

### 5.7 - Simplify and Use Square Roots

- Evaluating, Estimating, and Approximating Square Roots
  - Evaluate square root expressions (20)
  - Estimate square roots (20)
  - Approximate square roots (20)
- Simplifying Square Roots with Variables and Square Roots in Applications
  - Simplify a variable expression with square roots (20)
  - Use a square root in applications

## **Chapter 6 - Percents**

### 6.1 - Understand Percent

- Definition of Percent and Converting Percents
  - Use the definition of percent
  - Convert percents to fractions (20)
  - Convert percents to decimals (20)
  - Convert decimals and fractions to percents (20, 20)

### 6.2 - Solve General Applications of Percent

- Percent Equations and Percent Increase and Decrease
  - Translate and solve a basic percent equation (20, 20)
  - Solve applications of percent
  - Find percent increase and percent decrease

### 6.3 - Solve Sales Tax, Commission, and Discount Applications

- Using Percents with Sales Tax, Commission, and Discount Applications
-

- Solve sales tax applications
- Solve commission applications
- Solve discount applications
- Solve mark-up applications

#### 6.4 - Solve Simple Interest Applications

- Solving Simple Interest Applications
  - Use the simple interest formula
  - Solve a simple interest application

#### 6.5 Solve Proportions and Their Applications

- Proportions and Applications Using Proportions
  - Use the definition of proportion
  - Solve problems involving proportions (20)
  - Solve applications using proportions
- Writing and Solving Percent Proportions
  - Write percent equations as proportions
  - Translate and solve percent proportions

### **Chapter 7 - The Properties of Real Numbers**

#### 7.1 - Rational and Irrational Numbers

- Classifying Real Numbers
  - Identify rational numbers and irrational numbers (20)
  - Classify different types of real numbers

#### 7.2 - Commutative and Associative Properties

- Simplifying Expressions with the Commutative and Associative Properties
  - Use the associative and commutative properties
  - Evaluate expressions using the commutative and associative properties
  - Simplify expressions using the commutative and associative properties
  - Simplify expressions involving fractions or decimals using the commutative and associative properties

#### 7.3 - Distributive Property

- Simplifying Expressions with the Distributive Property
    - Use the distributive property to simplify expressions (20)
    - Simplify expressions involving fractions or decimals with the distributive property (20)
    - Simplify expressions using the distributive property where a variable needs distributed (20)
    - Simplify expressions using the distributive property where a negative number needs distributed (20)
  - Evaluating Expressions with the Distributive Property
    - Use the distributive property as a step in the order of operations
    - Evaluate expressions using the distributive property
-

#### 7.4 - Properties of Identity, Inverses, and Zero

- Use the Properties of Identity, Inverses, and Zero to Simplify Expressions
  - Recognize the identity properties of addition and multiplication
  - Use the inverse properties of addition and multiplication
  - Use the properties of zero
  - Simplify expressions using the properties of identities, inverses, and zero

#### 7.5 - Systems of Measurement

- Unit Conversions in the US System
  - Make a unit conversion in the US system
  - Use mixed units in the US System
- Unit Conversions in the Metric System
  - Make a unit conversion in the metric system
  - Use mixed units in the metric system
- Unit Conversions Between the US and Metric System
  - Convert between the US and the metric systems of measurement
  - Convert between Celsius and Fahrenheit temperatures

### **Chapter 8 - Solving Linear Equations**

#### 8.1 - Solve Equations Using the Subtraction and Addition Properties of Equality

- Simplifying and Solving Equations Using the Subtraction and Addition Properties of Equality
  - Solve equations using the Subtraction and Addition Properties of Equality
  - Solve equations that need to be simplified using the Subtraction and Addition Properties of Equality
- Solving Application Problems with the Subtraction and Addition Properties of Equality
  - Translate an equation and solve using the Subtraction and Addition Properties of Equality
  - Translate and solve applications using the Subtraction and Addition Properties of Equality

#### 8.2 - Solve Equations Using the Division and Multiplication Properties of Equality

- Simplifying and Solving Equations Using the Division and Multiplication Properties of Equality
  - Solve equations using the Division and Multiplication Properties of Equality (20, 20)
  - Solve equations that need to be simplified using the Division and Multiplication Properties of Equality (20)

#### 8.3 - Solve Equations with Variables and Constants on Both Sides

- A General Strategy for Solving Equations
  - Solve equations with constants on both sides (20)
  - Solve an equation with variables on each side (20)
  - Solve an equation with variables and constants on both sides (20)
  - Solve equations using a general strategy (20)

#### 8.4 - Solve Equations with Fraction or Decimal Coefficients

- Use a General Strategy for Solving Equations with Fractions
-

- Solve equations with fraction coefficients (20)
- Solve equations with fraction coefficients and the distributive property (20)
- Use a General Strategy for Solving Equations with Decimals
  - Solve equations with decimal coefficients (20)
  - Solve equations with decimal coefficients and the distributive property (20)

## **Chapter 9 - Math Models and Geometry**

### 9.1 - Use a Problem Solving Strategy

- Introduction to Problem Solving and Number Problems
  - Use a problem solving strategy for word problems
  - Solve number word problems (20)
  - Solve number problems involving multiple numbers (20)
  - Solve number problems involving consecutive integers (20)

### 9.2 - Solve Money Applications

- Solve Problems Involving Coins, Tickets, or Stamps
  - Solve a coin word problem
  - Solve a ticket or stamp word problem

### 9.3 - Use Properties of Angles, Triangles, and the Pythagorean Theorem

- Solve Problems with Angle Measures and Similar Triangles
  - Use the definitions of supplementary and complementary angles to solve problems
  - Find the measures of angles of a triangle using properties
  - Use the properties of similar triangles to solve problems
- Solve Problems with the Pythagorean Theorem
  - Use the Pythagorean Theorem to find the length of a missing side of a right triangle
  - Use the Pythagorean Theorem to solve application problems

### 9.4 - Use Properties of Rectangles, Triangles, and Trapezoids

- Find the Area and Perimeter of Rectangles
  - Understand linear, square, and cubic measure and the definition of area and perimeter
  - Solve problems involving the area and perimeter of rectangles
  - Use the area or perimeter of a rectangle to find the length or width of a rectangle when one side is given in terms of another
- Find the Area and Perimeter of Triangles
  - Solve problems involving the area and perimeter of triangles
  - Solve problems involving the area and perimeter of isosceles or equilateral triangles

### 9.5 - Solve Geometry Applications with Circles and Irregular Figures

- Find the Area of Trapezoids
    - Use properties of trapezoids
  - Area and Circumference of Circles and Area of Irregular Figures
    - Solve problems involving the area and circumference of circles
    - Find the area of irregular figures made from rectangles and triangles
-

- Find the area of irregular figures made from circles and other shapes

#### 9.6 - Solve Geometry Applications - Volume and Surface Area

- Volume and Surface Area of Rectangular Solids and Spheres
  - Find volume and surface area of rectangular solids and cubes
  - Find volume and surface area of spheres
- Volume and Surface Area of Cylinders and Cones
  - Find volume and surface area of cylinders
  - Find volume of cones

#### 9.7 - Solve a Formula for a Specific Variable

- The Distance, Rate, and Time Formula and Solving for a Specific Variable
  - Use the distance, time, and rate formula
  - Solve a given formula for a specific variable
  - Solve a formula for  $y$  (20)

### **Chapter 10 - Polynomials**

#### 10.1 - Add and Subtract Polynomials

- Names and Degrees of Polynomials
  - Identify polynomials, monomials, binomials, and trinomials (20)
  - Determine the degree of polynomials (20)
- Adding, Subtracting, and Evaluating Polynomials
  - Add or subtract monomials (20)
  - Add or subtract polynomials (20)
  - Evaluate a polynomial for a given value (20)

#### 10.2 - Use Multiplication Properties of Exponents

- Simplifying Expressions with the Multiplication Properties of Exponents
  - Evaluate numerical expressions with exponents (20)
  - Simplify expressions using the Product Property of Exponents (20)
  - Simplify expressions using the Power Property of Exponents (20)
  - Simplify expressions using the Product to a Power Property (20)
  - Simplify expressions by applying several of the multiplication properties of exponents
- Multiplying Polynomials by Monomials
  - Multiply two monomials (20)
  - Multiply a monomial by a polynomial

#### 10.3 - Multiply Polynomials

- Multiplying Binomials and Polynomials
    - Multiply a binomial by a binomial using the distributive property (20)
    - Multiply a binomial by a binomial using the FOIL method (20)
    - Multiply a trinomial by a binomial using the distributive property (20)
  - Multiplying Polynomials with the Vertical Method
    - Multiply polynomials using the vertical method (20)
-

#### 10.4 - Divide Monomials

- Simplifying Expressions with the Division Properties of Exponents and Dividing Monomials
  - Simplify expressions using the Quotient Property of Exponents and the Zero Property of Exponents (20)
  - Simplify an expression using the Quotient to a Power Property (20)
  - Simplify expressions by applying several properties of exponents
  - Divide two monomials (20)

#### 10.5 - Integer Exponents and Scientific Notation

- Integer Exponents
  - Use the definition of negative exponents (20)
  - Simplify an expression with integer exponents (20)
- Scientific Notation and Operations with Scientific Notation
  - Convert decimal notation to scientific notation (20)
  - Convert scientific notation to decimal form (20)
  - Multiply or divide using scientific notation (20, 20)

#### 10.6 - Introduction to Factoring Polynomials

- Greatest Common Factors of Monomials and Polynomials
  - Find the greatest common factor of the given expressions (20)
  - Factor the greatest common factor out of a polynomial (20)
  - Factor a greatest common factor with a negative coefficient from a polynomial (20)

### **Chapter 11 - Graphs**

#### 11.1 - Use the Rectangular Coordinate System

- Plotting Points on a Rectangular Coordinate System
  - Plot points in a rectangular coordinate system
  - Identify the quadrants of points and plot points with a coordinate of zero
  - Identify points on a graph
- Solutions of Linear Equations
  - Verify solutions to an equation in two variables (20)
  - Complete a table of solutions to a linear equation
  - Find solutions to linear equations in two variables (20)

#### 11.2 - Graphing Linear Equations

- Graph Linear Equations and Vertical and Horizontal Lines by Plotting Points
  - Recognize the relation between the solutions of an equation and its graph
  - Graph a line by plotting points (20)
  - Graph a linear equation with  $x$  and  $y$  on the same side by plotting points (20)
  - Graph vertical or horizontal lines (20)

#### 11.3 - Graphing with Intercepts

- Graph Linear Equations with Intercepts
    - Identify the intercepts on a graph
-

- Find the intercepts from an equation of a line (20)
- Graph a line using the intercepts (20)
- Choose the most convenient method to graph a line

#### 11.4 - Understand Slope of a Line

- Understanding Slope
    - Use geoboards to model slope
    - Find the slope of a line from its graph
    - Find the slope of horizontal or vertical lines (20)
  - Graphing Lines with Slope and Applications of Slope
    - Find the slope of a line between two points by using the slope formula (20)
    - Graph lines given a point and the slope (20)
    - Solve slope applications (20)
-
