

CoRequisite Support for Quantitative Reasoning | Table of Contents

Chapter 1: Number Sense

1.1 - Introduction to Whole Numbers

- 1.1.1 Place Values and Rounding
 - Identify the place value of a digit and write a whole number using words or digits
 - Round whole numbers
- 1.1.2 Prime Factorization and Least Common Multiples
 - Identify multiples and apply divisibility tests
 - Express a number as a product of primes
 - Find the least common multiple of two numbers

1.2 Use the Language of Algebra

- 1.2.1 Use Variables and Algebraic Symbols
 - Translate algebraic expressions, equations, and inequalities into English and recognize expressions and equations
 - Evaluate a whole number raised to a power and understand the terminology
- 1.2.2 Order of Operations and Simplifying Expressions
 - Evaluate an expression
 - Identify coefficients and identify and combine like terms
 - Simplify an expression using order of operations
- 1.2.3 Rewrite English Phrases into Algebraic Expressions
 - Translate an English phrase to an algebraic expression
 - Translate English phrases from applications into algebraic expressions

1.3 Add and Subtract Integers

- 1.3.1 Introduction to Integers and Absolute Value
 - Order integers using inequality symbols and determine the opposite of integers or variables
 - Evaluate an absolute value expression
 - Simplify an expression involving absolute value using order of operations
- 1.3.2 Adding and Subtracting Integers
 - Add integers
 - Subtract integers
 - Add and subtract integers using order of operations

1.4 Multiply and Divide Integers

- 1.4 Multiply and Divide Integers
 - Find the product of integers
 - 1.4.1 Multiplying and Dividing Integers
 - Find the quotient of integers
 - 1.4.2 Simplifying Expressions with Integers
 - Simplify expressions with integers using order of operations
 - Evaluate a variable expression with integers
 - 1.4.3 Algebraic Expressions and Applications with Integers
 - Translate an English phrase to an algebraic expression with integers
 - Use integers in applications
-

1.5 Visualize Fractions

- 1.5.1 Simplifying Fractions
 - Identify when fractions are equivalent
 - Simplify a fraction
- 1.5.2 Multiplying and Dividing Fractions
 - Find the product of fractions
 - Find the quotient of fractions
 - Simplify complex fractions
- 1.5.3 Understanding Expressions with Fractions
 - Simplify expressions written with a fraction bar
 - Translate an English phrase to an expression with fractions

1.6 Add and Subtract Fractions

- 1.6.1 Adding and Subtracting Fractions
 - Add or subtract fractions with a common denominator
 - Add or subtract fractions with different denominators
- 1.6.2 Algebraic Expressions with Fractions
 - Use the order of operations to simplify complex fractions and expressions with multiple operations
 - Evaluate variable expressions with fractions

1.7 Decimals

- 1.7.1 Understanding and Rounding Decimals
 - Name and write decimals
 - Round decimals
- 1.7.2 Operations with Decimals
 - Add and subtract decimals
 - Multiply decimals
 - Divide decimals
- 1.7.3 Decimals, Fractions, and Percents
 - Convert between fractions and decimals
 - Simplify expressions with fractions and decimals
 - Convert between decimals and percents

1.8 Square Roots and the Real Number System

- 1.8.1 Square Roots and the Real Number System
 - Evaluate a square root
 - Identify rational and irrational numbers
 - Identify real numbers
- 1.8.2 Fractions and Decimals on the Number Line
 - Locate fractions on a number line and write inequality statements involving fractions
 - Locate decimals on a number line and write inequality statements involving decimals

1.9 Properties of Real Numbers

- 1.9.1 Properties of the Real Number System
 - Use the commutative and associative properties
 - Identify additive and multiplicative inverses of a number
 - Understand the multiplication and division properties of zero
-

- Simplify expressions using properties of identities, inverses, and zero
- 1.9.2 The Distributive Property
 - Simplify expressions using the distributive property
 - Simplify expressions by distributing a negative number
- 1.10 Systems of Measurements
 - 1.10.1 Unit Conversion in the US System
 - Make unit conversions in the US system
 - Use mixed units of measurement in the US system
 - 1.10.2 Unit Conversion in the Metric System
 - Make unit conversions in the metric system
 - Use mixed units of measurement in the metric system
 - 1.10.3 Unit Conversion Between Systems
 - Convert between the US and metric systems of measurement
 - Convert between Fahrenheit and Celsius temperatures

Chapter 2 - Solving Linear Equations and Inequalities

2.1 - Solve Equations Using the Subtraction and Addition Properties of Equality

- 2.1.1 Solve Equations with the Subtraction and Addition Properties of Equality
 - Verify a solution of an equation
 - Solve an equation involving fractions or decimals using the subtraction and addition properties of equality
 - Solve an equation that requires simplification using the subtraction and addition properties of equality
 - Solve an equation using the subtraction and addition properties of equality
- 2.1.2 Application Problems and the Subtraction and Addition Properties of Equality
 - Translate an English sentence to an algebraic equation and solve using the subtraction and addition properties of equality
 - Use the subtraction and addition properties of equality to solve application problems

2.2 - Solve Equations Using the Division and Multiplication Properties of Equality

- 2.2.1 Solve Equations with the Division and Multiplication Properties of Equality
 - Solve an equation using the division and multiplication properties of equality
 - Solve an equation involving fractions or decimals using the division and multiplication properties of equality
 - Solve an equation that requires simplification using the division and multiplication properties of equality
- 2.2.2 Application Problems and the Division and Multiplication Properties of Equality
 - Translate an English sentence to an algebraic equation and solve using the division and multiplication properties of equality
 - Use the division and multiplication properties of equality to solve application problems

2.3 - Solve Equations with Variables and Constants on Both Sides

- 2.3.1 Solving Linear Equations
 - Solve an equation with constants on both sides
 - Solve an equation with variables on both sides
-

- Solve an equation with constants and variables on both sides

2.4 - Use a General Strategy to Solve Linear Equations

- 2.4.1 General Strategies for Solving Linear Equations
 - Solve an equation using the distributive property with variables on one side
 - Solve an equation using the distributive property with variables on both sides
 - Classify equations as conditional, identity, or a contradiction

2.5 - Solve Equations with Fractions or Decimals

- 2.5.1 Solving Linear Equations with Fractions
 - Solve an equation involving fractions with variables on both sides
 - Solve an equation involving fractions by eliminating the fractions
 - Solve an equation involving fractions by eliminating the fractions and other steps
- 2.5.2 Solve Linear Equations with Decimals
 - Solve an equation involving decimals with variables on both sides
 - Solve an equation involving decimals by clearing the decimals

2.6 - Solve a Formula for a Specific Variable

- 2.6.1 Distance, Rate, and Time and Literal Equations
 - Use the distance, rate, and time formula
 - Solve a formula for a specific variable

2.7 - Solve Linear Inequalities

- 2.7.1 Inequalities, the Number Line, and Interval Notation
 - Graph an inequality on the number line
 - Express an inequality using interval notation
- 2.7.2 Solving One-Step Linear Inequalities
 - Solve an inequality using the subtraction and addition properties of inequality
 - Solve an inequality using the division and multiplication properties of inequality
- 2.7.3 Solving Linear Inequalities
 - Solve an inequality that requires simplification
 - Classify an inequality as conditional, identity, or contradiction
 - Translate an English sentence into an inequality and solve

Chapter 3 - Math Models

3.1 - Use a Problem-Solving Strategy

- 3.1.1 An Introduction to Problem Solving
 - Use a problem-solving strategy for word problems
 - Solve a number problem
 - Solve a number problem involving consecutive integers

3.2 - Solve Percent Applications

- 3.2.1 Percent Problems and Percent Increase and Decrease
 - Translate and solve basic percent equations
 - Solve basic applications of percent
 - Find percent increase or percent decrease
 - 3.2.2 Simple Interest and Discounts
 - Solve applications involving the simple interest formula
 - Solve applications with discount or mark-up
-

3.3 - Solve Mixture Applications

- 3.3.1 Solve Mixture Word Problems
 - Solve coin word problems
 - Solve ticket and stamp word problems
 - Use the mixture model to solve word problems

3.4 - Solve Geometry Applications - Triangles, Rectangles, and the Pythagorean Theorem

- 3.4.1 Triangles and the Pythagorean Theorem
 - Solve problems involving the perimeter, area, and interior angles of triangles
 - Solve triangle problems where angles or sides are given in terms of other angles or sides
 - Solve triangle problems using the Pythagorean Theorem
- 3.4.2 Area and Perimeter of Rectangles
 - Solve problems involving the perimeter and area of rectangles
 - Solve rectangle problems when the width is given in terms of the length

3.5 - Solve Uniform Motion Applications

- 3.5.1 Uniform Motion
 - Solve uniform motion applications

3.6 - Solve Applications with Linear Inequalities

- 3.6.1 Problem Solving with Linear Inequalities
 - Solve one-step applications with linear inequalities
 - Solve applications with linear inequalities

Chapter 4 - Graphs

4.1 - Use the Rectangular Coordinate System

- 4.1.1 Reading Graphs and the Rectangular Coordinate System
 - Plot points on a rectangular coordinate system
 - Verify the solution to an equation in two variables
 - Complete a table of solutions to a linear equation in two variables
 - Find solutions to a linear equation

4.2 - Graph Linear Equations in Two Variables

- 4.2.1 Graphing Linear Equations
 - Recognize the relationship between the solutions of an equation and its graph
 - Graph a linear equation by plotting points
 - Graph a linear equation in standard form by plotting points
 - Graph vertical and horizontal lines

4.3 - Graph with Intercepts

- 4.3.1 Intercepts on the Coordinate Plane
 - Identify the x- and y-intercepts on a graph
 - Find the x- and y-intercepts from an equation of a line
 - Graph a line using the x- and y-intercepts

4.4 - Understand Slope of a Line

- 4.4.1 Understanding Slope
 - Use a geoboard to model slope
 - Use the relationship between rise and run to find the slope of a line from its graph
 - Find the slope of horizontal and vertical lines
-

- 4.4.2 The Slope Formula
 - Use the slope formula to find the slope of a line between two points
 - Graph a line given a point and the slope
 - Determine the slope in applications
- 4.5 - Use the Slope-Intercept Form of an Equation of a Line
 - 4.5.1 Slope-Intercept Form
 - Identify the slope and y-intercept from an equation of a line and relate a graph to the equation
 - Graph a line given its equation using its slope and y-intercept
 - Graph lines using a variety of methods
 - Graph and interpret applications of slope-intercept
 - 4.5.2 Parallel and Perpendicular Lines
 - Use slopes to identify parallel lines
 - Use slopes to identify perpendicular lines
- 4.6 - Find the Equation of a Line
 - 4.6.1 Equations of Lines
 - Find an equation of the line given the slope and y-intercept
 - Find an equation of the line given the slope and a point
 - Find an equation of the line given two points
 - 4.6.2 Equations of Parallel and Perpendicular Lines
 - Find an equation of a line parallel to a given line
 - Find an equation of a line perpendicular to a given line
- 4.7 - Graphs of Linear Inequalities
 - 4.7.1 Graphing Linear Inequalities
 - Recognize the relationship between the solutions of an inequality and its graph
 - Graph a linear inequality
 - Verify solutions to an inequality in two variables

Chapter 5 - Systems of Linear Equations

- 5.1 - Solve Systems of Equations by Graphing
 - 5.1.1 Solving Systems of Linear Equations by Graphing
 - Determine whether an ordered pair is a solution of a system of linear equations
 - Solve a system of linear equations by graphing
 - Determine the number of solutions of a linear system
 - Solve applications of systems of linear equations by graphing
 - 5.2 - Solve Systems of Equations by Substitution
 - 5.2.1 Solving Systems of Linear Equations by Substitution
 - Solve a system of linear equations by substitution
 - Solve applications of systems of linear equations by substitution
 - 5.3 - Solve Systems of Equations by Elimination
 - 5.3.1 Solving Systems of Linear Equations by Elimination
 - Solve a system of linear equations by elimination
 - Solve applications of systems of equations by elimination
 - Solve a system of linear equations using a variety of methods
-

5.4 - Solve Applications with Systems of Equations

- 5.4.1 Systems of Linear Equations and Problem Solving
 - Translate a word problem to a system of equations
 - Solve a word problem using a system of equations
 - Solve an application in geometry using a system of equations
 - Solve uniform motion applications using a system of equations

5.5 - Solve Mixture Applications with Systems of Equations

- 5.5.1 Mixture Problems and Systems of Equations
 - Solve mixture applications involving tickets or money with a system of equations
 - Solve mixture applications involving concentrations using a system of equations
 - Solve interest applications using a system of equations

5.6 - Graphing Systems of Linear Inequalities

- 5.6.1 Solving Systems of Linear Inequalities
 - Determine whether an ordered pair is a solution of a system of linear inequalities
 - Solve a system of linear inequalities by graphing
 - Solve applications of systems of linear inequalities

Chapter 6: Financial Mathematics Support

6.1 Applications of interest

- 6.1.1 Applications of interest
 - Understanding applications of interest

6.2 Working with loans

- 6.2.1 Working with loans
 - Understanding different types of loans
 - Using different types of loans

6.3 Financial Formulas

- 6.3.1 Financial Formulas
 - Understanding financial formulas with interest
 - Understanding financial formulas with loans

Chapter 7 - Polynomials, Scientific Notation, and Exponents

7.1 - Add and Subtract Polynomials

- 7.1.1 Adding and Subtracting Polynomials
 - Identify the types and degrees of polynomials
 - Add and subtract monomials
 - Add and subtract polynomials
 - Evaluate a polynomial for a given value

7.2 - Use Multiplication Properties of Exponents

- 7.2.1 Product Properties of Exponents
 - Simplify numerical expressions containing exponents
 - Simplify expressions using the product property for exponents
 - Simplify expressions using the power property for exponents or the product to a power property for exponents
 - Simplify expressions by applying several properties
-

7.3 - Multiply Polynomials

- 7.3.1 Multiplying Polynomials
 - Multiply monomials
 - Multiply a polynomial by a monomial
 - Multiply a binomial by a binomial
 - Multiply a trinomial by a binomial

7.4 - Special Products

- 7.4.1 Special Products of Binomials
 - Square a binomial using the binomial squares pattern
 - Multiply conjugates using the product of conjugates pattern
 - Recognize and use the appropriate special product pattern

7.5 - Divide Monomials

- 7.5.1 Quotient Properties of Exponents and Dividing Monomials
 - Simplify expressions using the quotient property for exponents and the exponent of zero
 - Simplify expressions using the quotient to a power property
 - Simplify expressions by applying several quotient properties of exponents
 - Divide monomials

7.6 - Divide Polynomials

- 7.6.1 Dividing Polynomials
 - Divide a polynomial by a monomial
 - Divide a polynomial by a binomial using polynomial long division

7.7 - Integer Exponents and Scientific Notation

- 7.7.1 Negative Exponents
 - Use the definition of a negative exponent
 - Simplify expressions with integer exponents
- 7.7.2 Scientific Notation
 - Multiply and divide using scientific notation - FOR
 - Convert from decimal notation to scientific notation
 - Convert from scientific notation to decimal notation

Chapter 8 - Roots and Radicals

8.1 - Simplify and Use Square Roots

- 8.1.1 Understanding Square Roots
 - Simplify expressions with square roots
 - Estimate square roots and approximate square roots
 - Simplify variable expressions with square roots

8.2 - Simplify Square Roots

- 8.2.1 Simplifying Square Root Expressions
 - Use the product property to simplify square roots
 - Use the quotient property to simplify a perfect square fraction
 - Use the quotient property to simplify square roots

8.3 - Add and Subtract Square Roots

- 8.3.1 Adding and Subtracting Square Root Expressions
 - Add and subtract like square roots
-

- Add and subtract square roots that need simplification

8.4 - Multiply Square Roots

- 8.4.1 Multiplying Square Root Expressions
 - Multiply square roots
 - Use polynomial multiplication to multiply square roots
 - Use special product formulas to multiply square roots

8.5 - Divide Square Roots

- 8.5.1 Dividing Square Root Expressions and Rationalizing Denominators
 - Divide square roots
 - Rationalize a one-term denominator
 - Rationalize a two-term denominator

8.6 - Solve Equations with Square Roots

- 8.6.1 Solving Radical Equations
 - Solve a square root equation with a single radical
 - Solve a square root equation with two radicals
 - Use square roots in applications

8.7 - Higher Roots

- 8.7.1 Understanding Higher Roots
 - Simplify numerical expressions with higher roots
 - Simplify expressions with higher roots
- 8.7.2 Simplifying Higher Roots and Operations on Higher Roots
 - Use the product property to simplify expressions with higher roots
 - Use the quotient property to simplify expressions with higher roots
 - Add and subtract higher roots

8.8 - Rational Exponents

- 8.8.1 Simplifying Expressions with Rational Exponents
 - Simplify expressions with rational exponents and a numerator of 1
 - Simplify expressions with rational exponents and a numerator greater than 1
 - Use the laws of exponents to simplify expressions with rational exponents

Chapter 9: Factoring

9.1 - Greatest Common Factor and Factor by Grouping

- 9.1.1 The Greatest Common Factor and Factoring by Grouping
 - Find the greatest common factor of two or more expressions
 - Factor the greatest common factor from a polynomial
 - Factor a polynomial by grouping

9.2 - Factor Quadratic Trinomials with Leading Coefficient 1

- 9.2.1 Factoring Trinomials with a Leading Coefficient of 1
 - Factor a trinomial of the form x^2+bx+c where c is negative
 - Factor a trinomial of the form $x^2+bx+cy^2$
 - Factor a trinomial of the form x^2+bx+c where c is positive

9.3 - Factor Quadratic Trinomials with Leading Coefficient Other than 1

- 9.3.1 Factoring Trinomials with a Leading Coefficient Other than 1
 - Factor a trinomial using trial and error
-

- Factor a trinomial using the 'ac' method
- Factor a trinomial of the form ax^2+bx+c with a GCF

9.4 - Factor Special Products

- 9.4.1 Factoring Special Products
 - Factor a perfect square trinomial
 - Factor a difference of squares
 - Factor sums and differences of cubes

9.5 - General Strategy for Factoring Polynomials

- 9.5.1 Choosing a Factoring Strategy
 - Recognize and use the appropriate method to factor a polynomial completely

9.6 - Quadratic Equations

- 9.6.1 Solving Quadratic Equations by Factoring
 - Solve a factored quadratic equation using the zero product property
 - Solve a quadratic equation by factoring
 - Solve applications modeled by quadratic equations

Chapter 10: Rational Expressions and Equations

10.1 - Simplify Rational Expressions

- 10.1.1 Domain of Rational Expressions and Simplifying Rational Expressions
 - Determine the values for which a rational expression is undefined
 - Evaluate a rational expression
 - Simplify a rational expression
 - Simplify a rational expression with opposite factors

10.2 - Multiply and Divide Rational Expressions

- 10.2.1 Multiplying and Dividing Rational Expressions
 - Multiply rational expressions
 - Divide rational expressions
 - Multiply and divide more than two rational expressions

10.3 - Add and Subtract Rational Expressions with a Common Denominator

- 10.3.1 Adding and Subtracting Rational Expressions with a Common Denominator
 - Add rational expressions with a common denominator
 - Subtract rational expressions with a common denominator
 - Add and subtract rational expressions whose denominators are opposites

10.4 - Add and Subtract Rational Expressions with Unlike Denominators

- 10.4.1 Adding and Subtracting Rational Expressions with Unlike Denominators
 - Find the least common denominator of rational expressions
 - Find equivalent rational expressions
 - Add rational expressions with different denominators
 - Subtract rational expressions with different denominators

10.5 - Simplify Complex Rational Expressions

- 10.5.1 Simplifying Complex Fractions
 - Simplify a complex rational expression by writing it as division
 - Simplify a complex rational expression by using the LCD

10.6 - Solve Rational Equations

- 10.6.1 Solving Rational Equations
 - Solve a rational equation that results in a linear equation
 - Solve a rational equation that results in a quadratic equation
 - Solve a rational equation for a specific variable

10.7 - Solve Proportion and Similar Figure Applications

- 10.7.1 Proportions and Problem Solving with Rational Equations
 - Solve proportions
 - Solve applications with proportions
 - Solve similar figure applications

10.8 - Solve Uniform Motion and Work Applications

- Uniform Motion, Work, and Problem Solving
 - Solve uniform motion applications involving rational equations
 - Solve problems involving rates of work using rational equations
-
