

Prealgebra | Table of Contents

Chapter 1: Whole Numbers

1.1 Introduction to Whole Numbers

- Place Value and Rounding Whole Numbers
 - Identify whole numbers and counting numbers (20)
 - Model whole numbers and identify the place value of a digit
 - Use place value to name and write whole numbers (20)
 - Round a whole number (20)

1.2 Add Whole Numbers

- Adding Whole Numbers
 - Use addition notation (20)
 - Model addition of whole numbers
 - Add whole numbers without models
 - Add whole numbers that may require carrying (20)
- Applications of Adding Whole Numbers
 - Translate word phrases involving addition to math notation (20)
 - Add whole numbers in applications

1.3 Subtract Whole Numbers

- Subtracting Whole Numbers
 - Use subtraction notation (20)
 - Model subtraction of whole numbers
 - Subtract whole numbers
 - Subtract whole numbers that may require borrowing (20)
- Applications of Subtracting Whole Numbers
 - Translate word phrases involving subtraction to math notation (20)
 - Subtract whole numbers in applications (20)

1.4 Multiply Whole Numbers

- Multiplying Whole Numbers
 - Use multiplication notation (20)
 - Model multiplication of whole numbers
 - Multiply whole numbers by single digit numbers (20)
 - Multiply whole numbers by multi-digit numbers (20)
 - Applications of Multiplying Whole Numbers
 - Translate word phrases involving multiplication to math notation (20)
 - Multiply whole numbers in applications (20)
-

1.5 Divide Whole Numbers

- Dividing Whole Numbers
 - Use division notation (20)
 - Model division of whole numbers
 - Divide whole numbers by single digit numbers (20)
- Dividing Whole Numbers with Long Division
 - Divide whole numbers using long division (20)
 - Divide whole numbers using long division where there may be a remainder (20)
- Applications of Dividing Whole Numbers
 - Translate word phrases involving division to math notation (20)
 - Divide whole numbers in applications (20)

Chapter 2: The Language of Algebra

2.1 Use the Language of Algebra

- Variables, Expressions, and Equations
 - Use variables and algebraic symbols (20)
 - Use variables and algebraic symbols to describe inequalities (20)
 - Identify expressions and equations (20)
- Exponents and Order of Operations
 - Use exponent notation and evaluate exponential expressions involving whole numbers (20)
 - Simplify expressions using the order of operations (20)

2.2 Evaluate, Simplify, and Translate Expressions

- Evaluating and Simplifying Expressions
 - Evaluate algebraic expressions (20)
 - Identify terms, coefficients, and like terms (20, 20, 20)
 - Simplify expressions by combining like terms (20)
- Translating Phrases to Algebraic Expressions
 - Translate word phrases to algebraic expressions (20)
 - Write word phrases from applications as algebraic expressions (20)

2.3 Solving Equations Using the Subtraction and Addition Properties of Equality

- The Subtraction and Addition Properties of Equality
 - Determine whether a number is a solution of an equation (20)
 - Model the Subtraction Property of Equality
 - Solve equations using the Subtraction Property of Equality (20)
 - Solve equations using the Addition Property of Equality (20)
 - Translating Phrases to Algebraic Equations and Solving
 - Translate word phrases to algebraic equations (20)
-

- Translate to an equation and solve (20)

2.4 Find Multiples and Factors

- Identify Multiples and Use Divisibility Tests
 - Identify multiples of numbers (20)
 - Use common divisibility tests (20)
- Find Factors and Identify Prime and Composite Numbers
 - Find all the factors of a number (20)
 - Identify prime and composite numbers (20)

2.5 Prime Factorization and the Least Common Multiple

- Prime Factorization and the Least Common Multiple
 - Find the prime factorization of a composite number using a factor tree
 - Find the prime factorization of a composite number using the ladder method (20)
 - Find the least common multiple (LCM) of two numbers

Chapter 3: Integers

3.1 Introduction to Integers

- Integers on the Number Line and Opposites
 - Locate positive and negative numbers on the number line
 - Order positive and negative numbers
 - Find opposites (20)
 - Translate word phrases to expressions with integers
- Introduction to Absolute Value
 - Understand absolute value
 - Simplify expressions using the order of operations with absolute value

3.2 Add Integers

- Adding Integers and Variable Expressions Involving Integers
 - Model addition of integers
 - Add two integers (20)
 - Simplify expressions involving addition with integers (20)
 - Evaluate variable expressions involving addition with integers (20)
- Adding Integers in Applications
 - Translate word phrases involving addition to algebraic expressions (20)
 - Add integers in applications (20)

3.3 Subtract Integers

- Subtracting Integers and Variable Expressions Involving Integers
 - Model subtraction of integers
 - Subtract two integers (20)
 - Simplify expressions involving subtraction with integers (20)
 - Evaluate variable expressions involving subtraction with integers (20)
-

- Subtracting Integers in Applications
 - Translate word phrases involving subtraction to algebraic expressions (20)
 - Subtract integers in applications (20)

3.4 Multiply and Divide Integers

- Multiplying and Dividing Integers and Variable Expressions with Integers
 - Multiply two integers
 - Divide two integers
 - Simplify expressions involving multiplication or division with integers
 - Evaluate variable expressions involving multiplication or division with integers (20)
- Multiplying and Dividing Integers in Applications
 - Translate word phrases involving multiplication or division to algebraic expressions (20)

3.5 Solve Equations Using Integers and the Division Property of Equality

- The Subtraction and Addition Properties of Equality with Integers
 - Determine whether an integer is a solution of an equation (20)
 - Solve equations with integers using the Addition and Subtraction Properties of Equality
- The Division Property of Equality
 - Model the Division Property of Equality
 - Solve equations using the Division Property of Equality (20)
- Translating Phrases to Algebraic Equations with Integers and Solving
 - Translate to an equation with integers and solve (20)

Chapter 4: Fractions

4.1 Visualize Fractions

- Introduction to Fractions, Improper Fractions, and Mixed Numbers
 - Understand the meaning of fractions
 - Model improper fractions and mixed numbers
 - Convert between improper fractions and mixed numbers (20, 20)
 - Finding Equivalent Fractions
 - Model equivalent fractions
 - Find equivalent fractions (20)
 - Ordering Fractions and Mixed Numbers
 - Locate fractions and mixed numbers on the number line
 - Order fractions and mixed numbers
 - Operations with Fractions without Variables
 - Add or subtract fractions with a common denominator without variables
 - Add or subtract fractions with different denominators without variables
 - Multiply fractions without variables
 - Divide fractions without variables
-

4.2 Multiply and Divide Fractions

- Simplifying and Multiplying Fractions
 - Reduce a fraction to lowest terms
 - Multiply two fractions (20)
- Reciprocals and Dividing Fractions
 - Find reciprocals (20)
 - Divide two fractions (20)

4.3 Multiply and Divide Mixed Numbers and Complex Fractions

- Multiplying and Dividing Mixed Numbers
 - Multiply mixed numbers (20)
 - Divide mixed numbers (20)
- Simplifying Complex Fractions and Order of Operations with Fractions
 - Translate phrases to expressions with fractions
 - Simplify a complex fraction (20)
 - Simplify an expression written with a fraction bar

4.4 Add and Subtract Fractions with Common Denominators

- Adding and Subtracting Fractions with Common Denominators
 - Model fraction addition
 - Add fractions with a common denominator (20)
 - Model fraction subtraction
 - Subtract fractions with a common denominator (20)

4.5 Add and Subtract Fractions with Different Denominators

- Adding and Subtracting Fractions with Different Denominators
 - Find the least common denominator (LCD)
 - Convert fractions to equivalent fractions with the LCD (20)
 - Add and subtract fractions with different denominators
- Combining Fraction Operations
 - Identify and use fraction operations
 - Use the order of operations to simplify complex fractions
 - Evaluate a variable expression with fractions

4.6 Add and Subtract Mixed Numbers

- Adding and Subtracting Mixed Numbers with Common Denominators
 - Model addition of mixed numbers with a common denominator
 - Add mixed numbers with a common denominator (20)
 - Model subtraction of mixed numbers
 - Subtract mixed numbers with a common denominator (20)
 - Adding and Subtracting Mixed Numbers with Different Denominators
 - Add and subtract mixed numbers with different denominators
-

4.7 Solve Equations with Fractions

- Solve Equations with Fractions Using the Addition, Subtraction, and Division Properties of Equality
 - Determine whether a fraction is a solution of an equation
 - Solve equations with fractions using the Addition, Subtraction, and Division Properties of Equality (20)
- Solve Equations with Fractions Using the Multiplication Properties of Equality
 - Solve equations using the Multiplication Property of Equality (20)
 - Solve equations with a fraction coefficient using the Multiplication Property of Equality (20)
 - Translate sentences involving fractions to equations and solve

4.8 Operations with Fractions in Applications

- Operations with Fractions in Applications
 - Add or subtract fractions with a common denominator in applications (10, 10)
 - Add or subtract fractions with different denominators in applications (10, 10)
 - Multiply and divide fractions in applications (10, 10)
- Operations with Mixed Numbers in Applications
 - Add or subtract mixed numbers with a common denominator in applications (10, 10, 10)
 - Add or subtract mixed numbers with different denominators in applications (10, 10)
 - Multiply and divide mixed numbers in applications (10, 10)

Chapter 5: Decimals

5.1 Introduction to Decimals

- Naming Decimals and Converting Decimals to Fractions
 - Name decimals (20)
 - Write decimals (20)
 - Convert decimals to fractions or mixed numbers
- Ordering and Rounding Decimals
 - Locate decimals on the number line
 - Order decimals (20)
 - Round a decimal (20)

5.2 Decimal Operations

- Operations with Decimals
 - Add and subtract two decimals
 - Multiply two decimals (20)
 - Divide decimals by a whole number
 - Divide a decimal by another decimal (20)
 - Operations with Decimals in a Money Application
 - Use decimals in money applications
-

5.3 Decimals and Fractions

- Converting Fractions to Decimals and Order of Operations with Decimals
 - Convert fractions to decimals (20)
 - Order decimals and fractions
 - Simplify expressions involving decimals using the order of operations
- Circumference and Area of Circles
 - Find the circumference and area of circles with pi as a decimal approximation (20)
 - Find the circumference and area of circles with pi as a fractional approximation (20)

5.4 Solve Equations with Decimals

- Solving Equations Involving Decimals
 - Determine whether a decimal is a solution of an equation (20)
 - Solve equations with decimals (20)
 - Translate sentences involving decimals to an equation and solve

5.5 Averages and Probability

- Finding the Mean, Median, and Mode of a Set of Numbers
 - Calculate the mean of a set of numbers (20)
 - Find the median of a set of numbers (20)
 - Find the mode of a set of numbers (20)
- Calculating the Probability of an Event
 - Apply the basic definition of probability

5.6 Ratios and Rate

- Writing Ratios and Using Ratios in Applications
 - Write a ratio as a fraction (20)
 - Use ratios in applications
- Unit Rates and Unit Prices
 - Write a rate as a fraction
 - Find unit rates
 - Find unit price
 - Translate phrases to expressions as rates or ratios

5.7 Simplify and Use Square Roots

- Evaluating, Estimating, and Approximating Square Roots
 - Evaluate square root expressions (20)
 - Estimate square roots (20)
 - Approximate square roots (20)
 - Simplifying Square Roots with Variables and Square Roots in Applications
 - Simplify a variable expression with square roots (20)
 - Use a square root in applications
-

Chapter 6: Percents

6.1 Understand Percent

- Definition of Percent and Converting Percents
 - Use the definition of percent
 - Convert percents to fractions (20)
 - Convert percents to decimals (20)
 - Convert decimals and fractions to percents (20, 20)

6.2 Solve General Applications of Percent

- Percent Equations and Percent Increase and Decrease
 - Translate and solve a basic percent equation (20, 20)
 - Solve applications of percent
 - Find percent increase and percent decrease

6.3 Solve Sales Tax, Commission, and Discount Applications

- Using Percents with Sales Tax, Commission, and Discount Applications
 - Solve sales tax applications
 - Solve commission applications
 - Solve discount applications
 - Solve mark-up applications

6.4 Solve Simple Interest Applications

- Solving Simple Interest Applications
 - Use the simple interest formula
 - Solve a simple interest application

6.5 Solve Proportions and Their Applications

- Proportions and Applications Using Proportions
 - Use the definition of proportion
 - Solve problems involving proportions (20)
 - Solve applications using proportions
- Writing and Solving Percent Proportions
 - Write percent equations as proportions
 - Translate and solve percent proportions

Chapter 7: The Properties of Real Numbers

7.1 Rational and Irrational Numbers

- Classifying Real Numbers
 - Identify rational numbers and irrational numbers (20)
 - Classify different types of real numbers

7.2 Commutative and Associative Properties

- Simplifying Expressions with the Commutative and Associative Properties
 - Use the associative and commutative properties
-

- Evaluate expressions using the commutative and associative properties
- Simplify expressions using the commutative and associative properties
- Simplify expressions involving fractions or decimals using the commutative and associative properties

7.3 Distributive Property

- Simplifying Expressions with the Distributive Property
 - Use the distributive property to simplify expressions (20)
 - Simplify expressions involving fractions or decimals with the distributive property (20)
 - Simplify expressions using the distributive property where a variable needs distributed (20)
 - Simplify expressions using the distributive property where a negative number needs distributed (20)
- Evaluating Expressions with the Distributive Property
 - Use the distributive property as a step in the order of operations
 - Evaluate expressions using the distributive property

7.4 Properties of Identity, Inverses, and Zero

- Use the Properties of Identity, Inverses, and Zero to Simplify Expressions
 - Recognize the identity properties of addition and multiplication
 - Use the inverse properties of addition and multiplication
 - Use the properties of zero
 - Simplify expressions using the properties of identities, inverses, and zero

7.5 Systems of Measurement

- Unit Conversions in the US System
 - Make a unit conversion in the US system
 - Use mixed units in the US System
- Unit Conversions in the Metric System
 - Make a unit conversion in the metric system
 - Use mixed units in the metric system
- Unit Conversions Between the US and Metric System
 - Convert between the US and the metric systems of measurement
 - Convert between Celsius and Fahrenheit temperatures

Chapter 8: Solving Linear Equations

8.1 Solve Equations Using the Subtraction and Addition Properties of Equality

- Simplifying and Solving Equations Using the Subtraction and Addition Properties of Equality
 - Solve equations using the Subtraction and Addition Properties of Equality
 - Solve equations that need to be simplified using the Subtraction and Addition Properties of Equality
-

- Solving Application Problems with the Subtraction and Addition Properties of Equality
 - Translate an equation and solve using the Subtraction and Addition Properties of Equality
 - Translate and solve applications using the Subtraction and Addition Properties of Equality

8.2 Solve Equations Using the Division and Multiplication Properties of Equality

- Simplifying and Solving Equations Using the Division and Multiplication Properties of Equality
 - Solve equations using the Division and Multiplication Properties of Equality (20, 20)
 - Solve equations that need to be simplified using the Division and Multiplication Properties of Equality (20)

8.3 Solve Equations with Variables and Constants on Both Sides

- A General Strategy for Solving Equations
 - Solve equations with constants on both sides (20)
 - Solve an equation with variables on each side (20)
 - Solve an equation with variables and constants on both sides (20)
 - Solve equations using a general strategy (20)

8.4 Solve Equations with Fraction or Decimal Coefficients

- Use a General Strategy for Solving Equations with Fractions
 - Solve equations with fraction coefficients (20)
 - Solve equations with fraction coefficients and the distributive property (20)
- Use a General Strategy for Solving Equations with Decimals
 - Solve equations with decimal coefficients (20)
 - Solve equations with decimal coefficients and the distributive property (20)

Chapter 9: Math Models and Geometry

9.1 Use a Problem Solving Strategy

- Introduction to Problem Solving and Number Problems
 - Use a problem solving strategy for word problems
 - Solve number word problems (20)
 - Solve number problems involving multiple numbers (20)
 - Solve number problems involving consecutive integers (20)

9.2 Solve Money Applications

- Solve Problems Involving Coins, Tickets, or Stamps
 - Solve a coin word problem
 - Solve a ticket or stamp word problem

9.3 Use Properties of Angles, Triangles, and the Pythagorean Theorem

- Solve Problems with Angle Measures and Similar Triangles
 - Use the definitions of supplementary and complementary angles to solve problems
 - Find the measures of angles of a triangle using properties
 - Use the properties of similar triangles to solve problems
 - Solve Problems with the Pythagorean Theorem
-

- Use the Pythagorean Theorem to find the length of a missing side of a right triangle
- Use the Pythagorean Theorem to solve application problems

9.4 Use Properties of Rectangles, Triangles, and Trapezoids

- Find the Area and Perimeter of Rectangles
 - Understand linear, square, and cubic measure and the definition of area and perimeter
 - Solve problems involving the area and perimeter of rectangles
 - Use the area or perimeter of a rectangle to find the length or width of a rectangle when one side is given in terms of another
- Find the Area and Perimeter of Triangles
 - Solve problems involving the area and perimeter of triangles
 - Solve problems involving the area and perimeter of isosceles or equilateral triangles

9.5 Solve Geometry Applications with Circles and Irregular Figures

- Find the Area of Trapezoids
 - Use properties of trapezoids
- Area and Circumference of Circles and Area of Irregular Figures
 - Solve problems involving the area and circumference of circles
 - Find the area of irregular figures made from rectangles and triangles
 - Find the area of irregular figures made from circles and other shapes

9.6 Solve Geometry Applications - Volume and Surface Area

- Volume and Surface Area of Rectangular Solids and Spheres
 - Find volume and surface area of rectangular solids and cubes
 - Find volume and surface area of spheres
- Volume and Surface Area of Cylinders and Cones
 - Find volume and surface area of cylinders
 - Find volume of cones

9.7 Solve a Formula for a Specific Variable

- The Distance, Rate, and Time Formula and Solving for a Specific Variable
 - Use the distance, time, and rate formula
 - Solve a given formula for a specific variable
 - Solve a formula for y (20)

Chapter 10: Polynomials

10.1 Add and Subtract Polynomials

- Names and Degrees of Polynomials
 - Identify polynomials, monomials, binomials, and trinomials (20)
 - Determine the degree of polynomials (20)
 - Adding, Subtracting, and Evaluating Polynomials
 - Add or subtract monomials (20)
 - Add or subtract polynomials (20)
-

- Evaluate a polynomial for a given value (20)

10.2 Use Multiplication Properties of Exponents

- Simplifying Expressions with the Multiplication Properties of Exponents
 - Evaluate numerical expressions with exponents (20)
 - Simplify expressions using the Product Property of Exponents (20)
 - Simplify expressions using the Power Property of Exponents (20)
 - Simplify expressions using the Product to a Power Property (20)
 - Simplify expressions by applying several of the multiplication properties of exponents
- Multiplying Polynomials by Monomials
 - Multiply two monomials (20)
 - Multiply a monomial by a polynomial

10.3 Multiply Polynomials

- Multiplying Binomials and Polynomials
 - Multiply a binomial by a binomial using the distributive property (20)
 - Multiply a binomial by a binomial using the FOIL method (20)
 - Multiply a trinomial by a binomial using the distributive property (20)
- Multiplying Polynomials with the Vertical Method
 - Multiply polynomials using the vertical method (20)

10.4 Divide Monomials

- Simplifying Expressions with the Division Properties of Exponents and Dividing Monomials
 - Simplify expressions using the Quotient Property of Exponents and the Zero Property of Exponents (20)
 - Simplify an expression using the Quotient to a Power Property (20)
 - Simplify expressions by applying several properties of exponents
 - Divide two monomials (20)

10.5 Integer Exponents and Scientific Notation

- Integer Exponents
 - Use the definition of negative exponents (20)
 - Simplify an expression with integer exponents (20)
- Scientific Notation and Operations with Scientific Notation
 - Convert decimal notation to scientific notation (20)
 - Convert scientific notation to decimal form (20)
 - Multiply or divide using scientific notation (20, 20)

10.6 Introduction to Factoring Polynomials

- Greatest Common Factors of Monomials and Polynomials
 - Find the greatest common factor of the given expressions (20)
 - Factor the greatest common factor out of a polynomial (20)
 - Factor a greatest common factor with a negative coefficient from a polynomial (20)
-

Chapter 11: Graphs

11.1 Use the Rectangular Coordinate System

- Plotting Points on a Rectangular Coordinate System
 - Plot points in a rectangular coordinate system
 - Identify the quadrants of points and plot points with a coordinate of zero
 - Identify points on a graph
- Solutions of Linear Equations
 - Verify solutions to an equation in two variables (20)
 - Complete a table of solutions to a linear equation
 - Find solutions to linear equations in two variables (20)

11.2 Graphing Linear Equations

- Graph Linear Equations and Vertical and Horizontal Lines by Plotting Points
 - Recognize the relation between the solutions of an equation and its graph
 - Graph a line by plotting points (20)
 - Graph a linear equation with x and y on the same side by plotting points (20)
 - Graph vertical or horizontal lines (20)

11.3 Graphing with Intercepts

- Graph Linear Equations with Intercepts
 - Identify the intercepts on a graph
 - Find the intercepts from an equation of a line (20)
 - Graph a line using the intercepts (20)
 - Choose the most convenient method to graph a line

11.4 Understand Slope of a Line

- Understanding Slope
 - Use geoboards to model slope
 - Find the slope of a line from its graph
 - Find the slope of horizontal or vertical lines (20)
 - Graphing Lines with Slope and Applications of Slope
 - Find the slope of a line between two points by using the slope formula (20)
 - Graph lines given a point and the slope (20)
 - Solve slope applications (20)
-
